

BLUE ANGEL

The German Ecolabel

Compostable Plant Containers and other Mouled Parts

DE-UZ 17

Basic Award Criteria

Edition January 2008

Version 5

The Environmental Label is supported by the following four institutions:

Federal Ministry
for the Environment, Nature Conservation
and Nuclear Safety

The Federal Ministry for the Environment, Nature Conservation and Nuclear Safety is the owner of the label. It regularly provides information on the decisions taken by the Environmental Label Jury.

The German Environmental Agency with its specialist department for "Ecodesign, Eco-Labeling and Environmentally friendly Procurement" acts as office of the Environmental Label Jury and develops the technical criteria of the Basic Criteria for Award of the Blue Angel.

The Environmental Label Jury is the independent, decision-making body for the Blue Angel and includes representatives from environmental and consumer associations, trade unions, industry, the trade, crafts, local authorities, academia, the media, churches, young people and the German federal states.

The RAL gGmbH is the awarding body for the Environmental Label. It organises the process for developing the relevant award criteria in independent expert hearings – which involve all relevant interest groups.

1 Introduction

1.1 Preface

In cooperation with the Federal Ministry for the Environment, Nature Conservation and Nuclear Safety, the German Environmental Agency and considering the results of the expert hearings conducted by RAL gGmbH, the Environmental Label Jury has set up these Basic Criteria for the Award of the Environmental Label. RAL gGmbH has been tasked with awarding the Environmental Label.

Upon application to RAL gGmbH and on the basis of a Contract on the Use of the Environmental Label to be concluded with RAL gGmbH, the permission to use the Environmental Label may be granted to all products, provided that they comply with the requirements as specified hereinafter.

The product must comply with all the legal requirements in the country in which it is to be marketed. The applicant shall declare that the product meets this requirement.

1.2 Objectives of the Environmental Label

The object of this Environmental Label is to promote the use of plant pots and other moulded parts designed for gardening purposes the materials/substances of which are completely biodegradable. As a result, plant pots and plants need not to be separated but may be planted together while other moulded parts may be directly forwarded to composting.

2 Scope

These Basic Criteria apply to

- plant pots, flower arrangement trays and moulded parts used in the gardening business for plant nursery, preplanting, planting, keeping, transport as well as for the production of floristic arrangements.¹
- similar long-lived moulded parts, e.g. wastepaper baskets.

Excluded are packaging materials as defined in DIN 55 405 T 3.

3 Requirements

The Environmental Label shown on page 1 may be used for the marking of products listed under paragraph 2, provided that they comply with the following requirements:

¹ The Environmental Jury is enabled to widen the scope if other compostable products are available

3.1 Degradability

The products must be made of 100 per cent biodegradable (compostable) substances, such as straw, cork, wood flour, maize starch.

3.2 Plastics

The following substances must not be contained in the products:

- ◆ synthetic plastic materials
- ◆ plasticizers
- ◆ PVC-containing materials.

3.3 Purpose

The products must meet the serviceability requirements for the respective intended use.

3.4 Biocides

Products according to paragraph 2.1 must not contain any biocide substances, such as found for example in pesticides or preservatives.

Compliance Verifications

- The applicant shall declare the requirements to paragraph 3.1 to 3.4 in Annex 1.
- The applicant shall name the product ingredients and their respective shares.
- The applicant shall present product samples and product descriptions (brochures).

4 Applicants and Parties Involved

Distributors of final products according to Paragraph 2 shall be eligible for application.

Parties involved in the award process are:

- RAL gGmbH to award the Blue Angel Environmental Label,
- the federal state being home to the applicant's production site,
- Umweltbundesamt (German Environmental Agency) which after the signing of the contract receives all data and documents submitted in applications for the Blue Angel in order to be able to further develop the Basic Award Criteria.

5 Use of the Environmental Label

The use of the Environmental Label by the applicant is governed by a contract on the use of the Environmental Label concluded with RAL gGmbH.

Within the scope of such contract, the applicant undertakes to comply with the requirements under Paragraph 3 while using the Environmental Label.

Contracts on the Use of the Environmental Label are concluded to fix the terms for the certification of products under Paragraph 2. Such contracts shall run until December 31, 2021.

They shall be extended by periods of one year each, unless terminated in writing by March 31, 2021 or March 31 of the respective year of extension.

After the expiry of the contract, the Environmental Label may neither be used for labelling nor for advertising purposes. This regulation shall not affect products being still in the market.

The applicant (manufacturer) shall be entitled to apply to RAL gGmbH for an extension of the right to use the ecolabel on the product entitled to the label if it is to be marketed under another brand/trade name and/or other marketing organisations.

The Contract on the Use of the Environmental Label shall specify:

- Applicant (distributor)
- Brand/trade name, product description
- Distributor (label user), i.e. the above-mentioned marketing organisations.
