# ABOUT US IN A NUTSHELL

We are a family business operating for over 20 years based in the south-east of Poland that specialises in the production and distribution of premium quality engineered flooring.

Every year, we export over 90% of our products that enrich the space of customers in Europe, North America and Poland.

Our production facilities are equipped with modern tools: a line for profiling floors by H.B Schroeder GmbH, a line for oiling and varnishing by CEFLA Finishing and an automatic line for packing floors by Mecca Moderna.

**20**

We have been operating continuously for over 20 years

**500.000**

We delivery over 500.000m2 of flooring per year

**7**

production halls

**17**

wood drying chambers

---

Our professionalism and the quality of the flooring has been confirmed by the following certificates:

# OUR PRODUCTS

## PREMIUM

This is the highest grade available in timber flooring. Specially selected material with a delicate wood grain and subdued, uniform colouring. Small knots allowed only. Sapwood does not occur. If you like an engineered oak floor with minimal feature and character, this is for you.

## STANDARD

The wood contains very few and small knots. Colour variation is controlled to the minimum. The finish will be clear, with virtually no major visible flaws. It's perfect for customers who want clean and uniform look of their floor.

## STYLE

Products are characterized by clear and contrasting grains, as well as visible knots and cracks. The putty used to fill in the cracks can be either lighter or darker in colour and can look attractive in both ways, depending on personal preference. This is the floor for you if you like feature and character.

# \* WIDE PLANK

Thickness ( $\leq 0.2\text{mm}$ )
