

SUSTAINABILITY CREATES GOOD KARMA

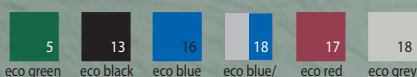

As one of the first product series to be ecologically orientated (since 2006), KARMA continues with its forward-looking and responsible approach to resource use in the field of office organisation. The HAN KARMA series uses post-consumer materials (plastics from recycled products).

Since its creation, the successful Eco-Line KARMA has been continually expanded with new products and colours. All products in the KARMA family have not only been awarded the the „Blue Angel“ environmental certificate, but also bear the „Austrian Ecolabel“.

We take environmental protection seriously:

- Ecologically thought-out products made predominantly from recycled materials
- Consumption- and energy-saving technologies according to the latest standards
- Shortest logistics routes due to procurement and distribution locations in Germany
- Efficient, resource-saving packaging concepts
