

Product Description

- Usuable on formwork before pouring of the concrete, ensures a residue-free separation of formwork and concrete
- Biodegradable release agent for all types of formwork
- Especially well suited for high quality exposed concrete

Product Features

- Easy and efficient to use
 - Trouble free ready to use application by spraying, rolling or brushing
 - Economical in consumption
 - Outstanding release efficiency helps to minimize cleaning prior to re-use of the formwork
- Excellent surface/material compatibility
 - Enables high quality, low-porosity concrete surfaces
 - Minimises the formation of cracks or holes on the concrete surface
 - For absorbent and non-absorbent formworks (treated and untreated wood and plastic)
 - Usable with heated formworks up to 60 °C
- Safe, reliable and very ecological
 - Extends lifetime of the formwork and improves profitability in general
 - Mineral oil and solvent free therefor very low environmental hazard
 - Biodegradable to a high degree
 - If applied correctly adhesion of subsequent coatings (insulation material, plaster, paints) are not affected

Instructions for Use

- Ready to use product
- Apply by brush, roll or sprayer on the formwork
- The support should be cleaned of impurities and dust
- Can be applied to absorbent and non-absorbent formworks
- Consumption varies depending on the absorption of the material to be treated
- Release agent spills and a too extensive application are to be avoided

Shelf life and storage

Shelf life applies when the product is stored in its original packing at room temperature.

Safety

Please follow notes in the applicable Safety Data Sheet. Safety Data Sheet is available on the Berner Webshop (not for cosmetic products).

Liability

The information contained in the technical data sheet is the result of our findings, user-specific experience and expectations. As the operational conditions and fields of application respecting the products vary greatly, we can only give general processing instructions and recommendations by means of these technical data sheets. We provide these instructions and this information to the best of our knowledge and without binding effect, excluding any liability and without any warranty as regards correctness and completeness. The technical data sheets do not represent warranted characteristics, do not involve any ancillary obligation and are of an only facultative nature. Use of these data sheets does not release customers and respective downstream users from performing their own tests and trials concerning the suitability of the products for the intended processes and purposes, and from observing any industrial property rights of third parties.

Relevant standards and technical rules must be complied with. State-of-the-art technology is to be observed when carrying out any coating work and pertaining preparations. The object conditions and product suitability are to be checked in an appropriate and professional manner. With respect to danger warnings and security recommendations, in particular first aid measures, reference is made to the respective container and pack labels and to the relevant security data sheets. The current status of the security data sheets and other documentation can be accessed on the Berner homepage or requested from the responsible Berner company. The technical data sheets may be subject to technical changes, and amendments may be made to the technical data sheets without prior notification. This technical datasheet ceases to be valid upon publication of a new version.
