- schadstoffarm
- kläranlagenverträglich

Areas of application and recommended dilution:

Well suited for all chemical toilets (toilet-cabins, mobile toilets) in omnibuses, caravans, aircrafts, boats and campgrounds.

1 : 133

Dose 75 ml product and 2-3 l of water into the waste holding tank (per 10 l tank volume). Do not add to the fresh water tank or mix with other sanitary additives. The recommended dosage is adequate for four days on average at 28 °C maximum. Avoid an over dosage, because this does not enhance the effect! Reduce the intervals of emptying in case of higher temperatures, if necessary.

The tank volume must not be emptied at disposal facilities other than those designed for faeces. Do not discharge into aquatic or terrestrial systems. Keep out of reach of children.

Store the product between -20 °C and 40 °C maximum. In case of proper storage the product is stable at least for two years.

Characterisation:

Appearance:

Deep blue liquid with a scent of cherry.

Ingredients:

Preparation from non-ionic surfactants, inorganic salts, perfume and colour in water.

pH value:

Slightly acidic.
