The final product is onematerial particularly elegant and fashionable, eco-innovative with an infinite imaginative solutions and colors. A durable, reusable and recyclable onematerial, allow eco-design in compliance with the EU PPWR regulation.

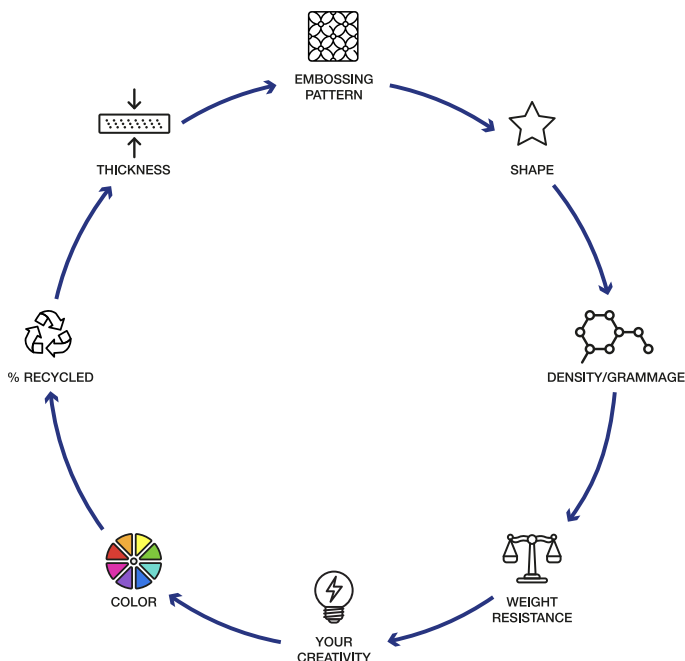

DESCRIPTION

TEXTURE EXAMPLES

Highly versatile for aesthetics and robustness, it can be configured to meet innovative design and specific performance requirements. The material is perfectly suited for various creative solutions for a wide range of packaging, bookbinding and durable goods. The selected recycled raw materials and the high density ensure excellent performances to any finished product.

APPROACH

DESIGNED FOR
SUSTAINABLE
PACKAGING

The high quality of the paperboard combined with the variety of color and design make the Infinity® collection ideal for applications with a refined aesthetic and high functional performance.

Infinity RePROJECT® is particularly suitable for brands that wish to convey a brand identity, thanks to the possibility of studying an exclusivity among our range or even creating customized embossing able to reflect the company's unique character.

The special 3D embossing makes a package difficult to replicate, offering an anti-counterfeiting advantage.

CONNOTATIONS

CERTIFICATIONS

MANUFACTURING PLANT LUCCA - 100% MADE IN ITALY

100% RECYCLED

COMPOSITION

Recycled raw materials are carefully selected and controlled by the selected and certified supply chains.

TAKE BACK:

- + our production trim recovery project on site.
- + we collect the leftovers from our customers to be fed into the production process

This is a circular accelerator reducing waste in the supply chain.

In cooperation with Intertek laboratories, we continuously monitor raw materials, process water and finished product in compliance with international regulations. In addition, the most restrictive limits of luxury and international brands become our benchmark target.

Fully recyclable product, with Aticelca Class A certification.

This means that 100% of the material can be fed back into the production cycle, without any previous treatment or waste production.

Aticelca® 11117-0004
