

iD Evolution

MODULAR TILES

Mineral
strength.
Natural
design.

Building new ground

Step into the world of iD Evolution, our non-PVC collection of modular tiles made from **64% mineral content**, seamlessly combining **strength, durability and environmental consciousness**.

The pursuit of 'always more' is threatening our planet and we need to find a way to deliver more with less.

To be gentler on the planet's impact, the product is manufactured in a plant that uses 100% green electricity and installation offcuts are recyclable.

iD Evolution has also been designed with people's health and wellbeing in mind as it also ensures excellent **indoor air quality** through **ultra-low VOC emissions**.

Made of polypropylene, a material commonly used in car bumpers, iD Evolution is engineered to thrive in **high traffic environments**, ensuring suitability for a variety of spaces. From dynamic workplaces and nurturing higher educational environments to stores and shops, as well as for aged care, iD Evolution offers a versatile solution tailored to various settings.

The **glue-down installation method** promises endurance and long-lasting stability.

iD Evolution presents itself as **one modular non-PVC solution** for all your building renovation projects.

LOWER EMISSIONS

iD Evolution flooring production is using **100% green electricity**.

The installation offcuts are recyclable.

GREATER WELL-BEING

Lowering our environmental footprint will never mean compromising on **comfort, health or overall well-being**.

iD Evolution is **free of phthalates, halogens and solvents**.

iD Evolution contributes to greater well-being as it is odourless and improves **indoor air quality** through **ultra-low VOC emissions**.

MORE PROOF

We commit to only using good materials in total transparency throughout production. (Details listed in our PHD).

Our Product Health Declaration provides fully transparent **evidence of the product's health credentials**.

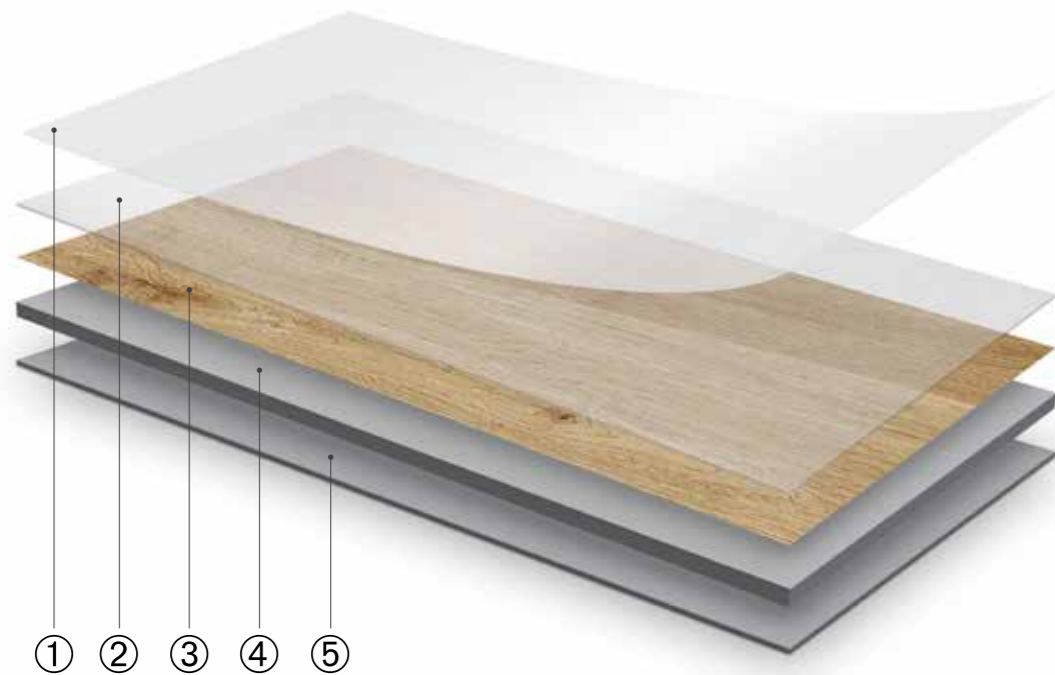

The way to better floors.

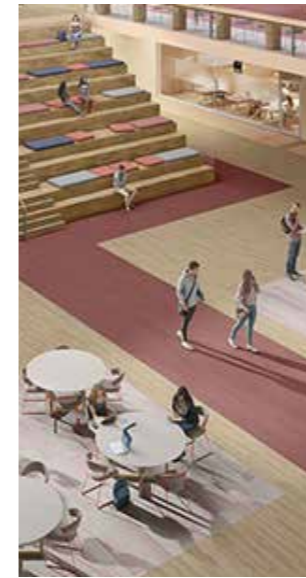

Minerality

iD Evolution boasts a high natural composition, with a **64% mineral content** sourced from two naturally occurring resources: chalk and brucite.

Robust for a long lifespan

- ① **Top Coat:** imparts a matte finish to the flooring and provides exceptional scratch resistance.
- ② **Wear Layer:** enhances the texture of the design and significantly bolsters its resistance to wear and tear.
- ③ **Printed Film:** employs top-quality printing techniques to achieve an authentic and natural appearance.
- ④ **Core Layer:** delivers structural strength and durability, while also assisting in mitigating transfer effects resulting from surface irregularities.
- ⑤ **Backing Layer:** ensures dimensional stability and balance.

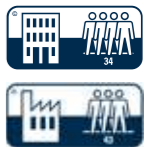

HIGH-TRAFFIC PERFORMANCES

iD Evolution stands as a rigidified product, tackling **high-traffic areas**.

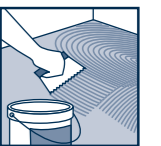

Unequalled resistance to scratches, stains, wear, and abrasions makes it a durable solution for your flooring needs.

A warranty **securing your investment** for years to come, making it an ideal choice for any space.

GLUE-DOWN INSTALLATION

Greater stability and less susceptibility to expansion and contraction resulting from fluctuations in temperature and humidity. The secure bond to the subfloor guarantees **no shifting or movement over time**.

EASY MAINTENANCE

A floor that lasts longer, with no need for harsh detergents and aggressive products. iD Evolution achieves **the best industry standards for soiling and cleaning**.

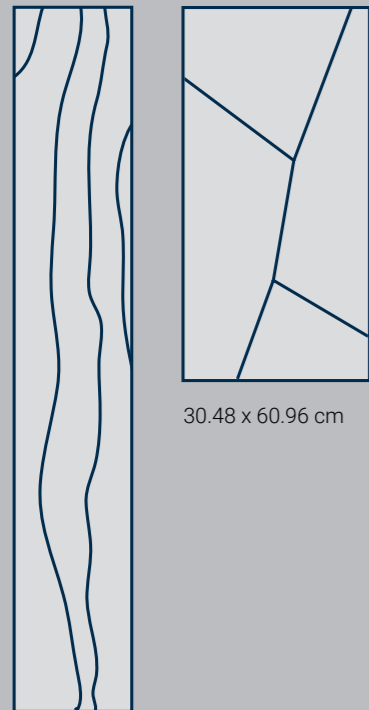

10 great designs

With iD Evolution, you can create a sleek and stylish aesthetic, whether you prefer the warmth of wooden décors or the contemporary appeal of concrete tiles.

Our matt finish and embossing techniques guarantee **authentic and natural décors**.

Oslo Concrete

The background of the page is a collage of textures. On the left, there are two overlapping rectangular panels with a grey, stone-like texture. On the right, there are two overlapping rectangular panels with a light brown wood grain texture. The panels are arranged in a way that they appear to be layered and slightly offset from each other.

Capturing the elegance of wood and stone

The iD Evolution range draws its inspiration from the most exquisite colours and designs found within our best-selling collections.

Its decorative patterns have been thoughtfully curated to offer **adaptable solutions for a wide spectrum of interior designs**, creating dynamism and style from the simplicity of Scandinavian minimalism to the opulence of French luxury, all with a touch of refined classicism.

These times are defined by a growing desire for **natural elements, and the biophilic trend** is gaining momentum.

iD Evolution has been meticulously crafted with this in mind, featuring **a natural colour palette** enriched with subtle yet inviting shades of warm grey.

KIEL OAK

Kiel City serves as a gateway to Scandinavia.

Much like this city positioned at the crossroads of two worlds, the appearance of this wood seamlessly blends classicism with Scandinavian softness. The texture of this premium wood is delicately white-oiled, exhibiting a palette of subdued yet lively colors.
