

**BUILD
YOURSELF
BIG!**

BUILD, PLAY, LEARN.

Welcome to the colourful world of Bioblo!

Thanks to their perforated honeycomb shape, Bioblo-blocks look completely different to “normal” toy blocks, thus breathing new life and bringing added educational value and plenty of fun into children’s rooms.

Our creed: Highest product quality for maximum playing fun.

Thanks to their special material composition, Bioblo-blocks are light yet stable, so that they bring joy to children for many years even when used daily. The blocks’ honeycomb shape makes them absolutely unique, opens up great new options and inspires the imagination of young and old alike.

Did you know?

**Throughout
Europe, more
than 200,000
children already
play with
Bioblo.**

ECO? LOGICAL!

It's what's in it that makes us win it!

Using our planet's resources responsibly is our highest priority. That's why when manufacturing our blocks, we rely on natural and recycled materials: Woodchips from local conifers from PEFC-certified forest management as well as recycled plastic from discarded reusable cups, which are given a new purpose as part of "Up-Cycling".

This saves resources, and something useful is created out of something old.

Bioblos are resistant to liquids and can thus be washed in soapy water. Any colour bleeding is impossible, as the colours are mixed right into the material instead of being added afterwards, as is the case when painting wooden toy blocks.

**100%
hygienic**

Bioblos are resistant to liquids and can thus be cleaned with all common disinfectants!

Excellent quality, multiple awards.

Bioblo-blocks are 100% free of plasticisers, heavy metals, PVC, bisphenol A (=BPA) and other harmful ingredients. Thanks to this, we are the only toy manufacturer to have been awarded both the Austrian eco-label and the German "Blue Angel"-certificate.

**Green
Product Award**
Winner 2015

Certification in accordance with the European toy safety standard EN-71 includes a load test, which checks the blocks for break resistance.

An innovation
from Austria!

BLOCK UPON BLOCK.

An important building block in developing motor-skills.

While the young generation effortlessly swipe and zoom across their smartphones, some motor skills increasingly fall by the wayside. This is where Bioblo blocks come in, because they contribute greatly to stimulating the development of eye-hand and hand-hand coordination, increase physical mechanical understanding and train perseverance and the ability to concentrate.

As Bioblo-blocks do not require any connecting elements, they are not always easy to put into place. But this has the great advantage that when playing, you never have to laboriously separate the blocks from each other! In addition, dealing directly with gravity trains the children's patience and frustration tolerance.

Many things in life are easier when doing them together. When Bioblo-building, the children playfully learn to work together and be considerate of each other. This way, they can complete even the biggest building projects without the help of adults - unless they also want to join in the fun!

FUN REDISCOVERED.

As diverse as the children's imagination.

In our feedback talks with parents and educators, one thing was confirmed time and again: Bioblo-building never gets boring! Because as the children grow, so do the challenges, and with the challenges also grows the joy of the self-created. One reason for this is the captivating simplicity of the blocks, another their unique honeycomb shape.

Because this opens up a number of additional creative options:

As Bioblos are resistant to liquids, they can even be used to blow soap bubbles!

We regularly feature Bioblo blocks at our events and have also made them an integral part of our indoor playgrounds. When the youngest ones want to have fun, the colourful blocks from Austria are simply indispensable.

Radio Vienna & ORF 1-presenter
event-specialist and
KidsKrone- editor in chief

Even the smallest ones can get started with Bioblos! This works particularly well with two-dimensional figures, colourful mandalas or fencing and enclosures for toy cars and animals.

With Bioblos, the children playfully discover the fascination of geometric figures. For example, when building a giant colourful cylinder around one of the playmates, which he or she then gets to "bust out of" as the highlight of the project.

If you build a tower over a lamp, you get fantastic light effects which shine in all colours and cast interesting shadow plays onto the wall.

Thanks to the many ways you can use Bioblos, they are excellently suited as construction and educational toys. But thanks to their durability and hardness, also for movement games both in- and outdoors.

OUR STANDARD-SETS

Big Box
Multi Mix

340x

No more lame excuses: The Big Box contains enough blocks to tackle even really big projects. So, what are you waiting for?

Fun Box
Multi Mix

200x

This set truly lives up to its name: With its expanded colour range, the Fun Box ensures plenty of fun and variety in the children's room.

Hello Box
Rainbow Mix

100x

These two boxes lay the foundation for any building career. If you have a little patience and imagination, you'll find that getting started is child's play! Available in classic "Rainbow Mix" or in the fabulously maritime "Ocean Mix".

Hello Box
Ocean Mix

100x

Start Box
Basic Mix

70x

As the name "Start Box" suggests, this mix of basic colours is perfect for getting started!

Colour Combo
Sweet Home

40x

The star of any birthday party: a gift from Bioblo! Those who'd rather not give away the handy parcel, can use it to complete their own Bioblo colour range. Available in the versions "Sweet Home", "Friend Ship" and "Rusty Robo".

Colour Combo
Friend Ship

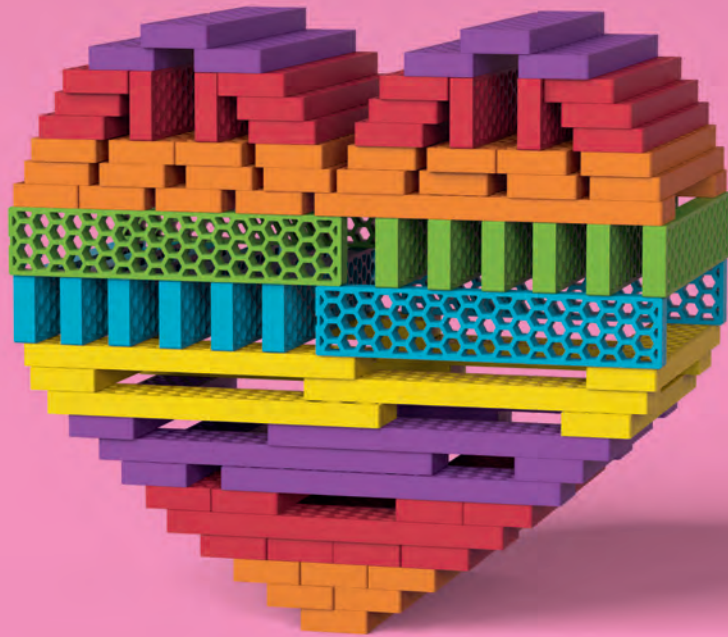

40x

Colour Combo
Rusty Robo

40x

HAVE
FUN
BUILDING!

At this store you can rescue a Bioblo box of your choice from its dreary existence on a cold, bare toy shelf.
