

BluCon translucent LDPE foil

Universal LDPE protective film designed for temporary protection against wind, rain, dust and other environmental factors. It is used as protection of building materials, protection of surfaces exposed to dirt or getting wet.

The BluCon translucent LDPE film is mainly used in the construction sector, but it is perfect for home and workshop conditions as protection against external factors.

The color of the film is semi-transparent, ensuring minimal light flow.

Film resistant to stretching and tearing.

It is available in widths from 1m to 12m and thickness from 30 to 300 microns
