

## **BluCon transparant LDPE foil**

Universal PCR foil with high transparency intended mainly for packing upholstered furniture. Packaging made of low density polyethylene LDPE. It provides excellent protection against dust and water during transport and storage of furniture. It is also used as protection of building materials and as protection of surfaces exposed to dirt or getting wet.

The BluCon transparant LDPE film is manufactured in a way that enables a durable and possibly durable connection with adhesive tapes.

Film resistant to stretching and tearing.

It is available in widths from 1m to 6m and thickness from 25 to 300 microns
