

MEISTER

Nadura®

As hard as a rock. As warm as wood. The new flooring class.

Modern tiles? Or a cosy wooden floor?

We say: both! The innovative Nadura floor makes this possible. Warm underfoot and natural like wood, robust and unbreakable like tiles – these properties are perfectly combined in Nadura flooring.

The main component of Nadura is the innovative “wood powder” – a mixture of fine wood fibres and mineral components that is compressed using pressure and high temperatures. Resulting in the Nadura surface – that is in fact both: as hard as a rock and as warm as wood! And it looks fantastic. Trendy imitation stone and metal in maxi tile format accentuates your modern decor.

Nadura makes the difference: a floor that is similar to ceramic and fine stoneware in hardness but is fitted with the warm to the foot feel-good factor of wood. This innovative material allows for a whole range of surface versions that replicate elegant slate and sandstone or modern concrete structures. Open up your rooms to a new dimension of design!

Considerably different. Considerably better.

The unique properties of Nadura floors are achieved by three layers bonded tightly together using pressure and heat. The core layer connects to the surface made from an extremely tough mix of wood and minerals. A special AquaSafe+ board made from special wood materials is used for the floors. Nadura backing stabilises the construction. Nadura flooring is also suitable for laying on subfloors with controlled hot water underfloor heating.

nadura®

**MADE
IN
GERMANY**

* Can be installed in humid rooms like e.g. bathrooms. This does not include outdoor areas and wet rooms, e.g. saunas, shower cubicles, steam rooms and rooms with a floor drain.

A class of its own!

As with every MEISTER product, an innovative spirit and a sharp eye for craftsmanship go hand-in-hand with Nadura. That's how we create products whose quality and design leave nothing to be desired.

Extremely durable

The high share of mineral substances gives the floor the toughness of a stone or ceramic tile. Whereas ceramic tiles split or crack when subject to impact, with Nadura only small dents or scratches result that can partly be repaired.

Nadura

Standard ceramic and fine stoneware tiles

Pleasantly warm to the foot

Due to the high share of wood fibres, body heat is drawn away slower than with ceramic or fine stoneware floors.

Anti-slip

The innovative surface combined with the embossed structure makes Nadura floors very anti-slip (category R9|R10).

Easy to clean ▶

Red wine, oils and other liquids can permanently discolour the necessary cement joints between stone and ceramic tiles. They can be removed without a trace from the Nadura joints.

Wet, coarse dirt can even be removed from the deeper surface structures as Nadura is extremely scrub and abrasion resistant.

◀ Water-resistant

Nadura flooring from MEISTER is water-resistant because it offers the comprehensive protection against humidity of the AquaSafe+ system. This consists of three effective elements that protect the floor from any moisture penetrating:

| Surface protection

The Nadura surface is waterproof.

| AquaStop edge impregnation & joint tightness

Together with the AquaStop edge impregnation, the specially developed and patented geometry of the click profile, which works with pre-tension, guarantees that the profile is sealed tightly and permanently.

| Anti-swelling base board

The "AquaSafe+" effective anti-swelling base board can largely prevent swelling in the event of contact with water (24 hours of protection at stagnant humidity).

Suitable for commercial use ▶

Nadura flooring is the perfect solution for commercial use: With wear class 23 | 34, they are suitable not only for heavily used private rooms but also for public areas with very heavy use (e.g. multi-purpose halls, department stores or airports). Nadura floors are also hardly flammable (B_{fl}-s1) and have a slip resistance class of R9 | R10.

For the perfect finish

With MEISTER you are sure that everything goes together!
Underlay materials, skirting boards, profiles and ends – you get everything
from one source, making your flooring into a long-lasting integrated
furnishing solution that suits you perfectly.

Open to all styles – white skirting boards.

What does white have that other colours don't have? Openness that adapts to any style and the ability to effortlessly complement all other colours. That is why our skirting boards with white decorative film enrich any living style and can be superbly combined with all floors. The large selection of different profile shapes enables you to also create classical and modern touches totally to your taste.

Skirting board 8 PK profile | Plain white gloss 324 (decorative film)

Skirting board 19 PK profile | Plain white gloss 324 (decorative film)

Colourful and full of character skirting boards you can paint yourself.

In the colour of your wall? To match your furniture?
Or completely different? It's up to you: design your
skirting boards totally according to your own ideas!
Covered in a film that can be painted, these mouldings
are prepared perfectly for you to realise your personal
ideas. Let your creativity run wild!

Skirting board 8 PK profile | White paintable 2222 (individual colour)

A harmonious look – with floor-matched skirting boards.

You quite rightly would like pure harmony within
your own four walls, and that's from the ground up.
You can achieve this effortlessly with skirting boards
coordinated to the colour or decor of your floor. The
balanced interplay between the floor and moulding
is rounded off by the impressively consistent decor
from moulding to moulding. This is how good perfect
harmony looks.

'How to': Moulding accessories

To ensure that even difficult corners and edges fit perfectly, MEISTER offers internal corners, external corners, end caps and connection pieces to match many mouldings. You can find the whole range at www.meister.com. Here, you will also find an overview of the different

profiles available for aligning adjacent floor coverings or French windows, suitable radiator rosettes, door stoppers and our recommended cleaning and protective care agents.

The complete system counts: Underlay for high-quality flooring

Without good underlay, it's not a good floor. The underlay material has a significant influence on the durability of the flooring and is an important component of how the entire system functions as far as day-to-day wear is concerned. Premium-quality flooring may suffer damage when laid on poor-quality underlay. High-quality underlay, on the other hand, ensures that your flooring will bring you lasting enjoyment; it prevents damage to the click connections through optimum pressure stability, for example, whereas excessively soft underlay can have a significantly negative effect on fold-down connections. When choosing an underlay material, both the

sub-flooring and the flooring to be installed are important. Whether your sub-flooring is concrete, wooden floorboards, drywall or existing flooring such as tiles or stone: With a comprehensive underlay range, MEISTER ensures that every MEISTER floor can be laid on your sub-flooring.

Sub-flooring Underlay	Silence 25 DB	Silence 20	Silence 15 DB	Twin Control	Foam film	PE-Folie
Wooden floorboards	–	✓	–	–	✓	–
Composite wood boards, oriented strand boards, drywall	–	✓	–	–	✓	–
Mineral subfloors (e.g. cement screed, anhydrite screed)	✓	✓ with PE film	✓	✓	✓ with PE film	✓
Mastic asphalt screed	–	✓	–	–	✓	–
Existing flooring (e.g. ceramic tile, natural stone, polymer)	✓	✓ with PE film	✓	✓	✓ with PE film	✓

MEISTER underlay materials:

Thanks to the special PUR mineral blend, MEISTER-Silence 25 DB, MEISTER-Silence 20 and MEISTER-Silence 15 DB are the perfect insulating underlay for effective sound absorption in the room and reduction of footfall transmitted to the rooms below. The high self-weight of the products also further improves their sound-absorbing properties. In the case of Silence 25 DB and 15 DB the vapour barrier is already integrated, eliminating the need to lay an additional PE film. This is also true for MEISTER Twin Control. The insulating underlay made from closed-cell, moisture-resistant, permanently elastic extruded polyurethane foam also features a practical, integrated self-adhesive strip along its length. With a roll length of 25 m, it is fast and easy to lay and additionally offers excellent footfall noise reduction. MEISTER foam film is an insulating underlay with a higher density

than many other commercially available foam films; in combination with MEISTER PE-film, it provides optimum moisture protection.

All MEISTER underlay materials can be installed on underfloor heating. They comply with the technical bulletin provided by the European Producers of Laminate Flooring (EPLF) based on CEN/TS 16354. The Silence products also meet the requirements of the technical bulletin issued by the Multilayer Modular Flooring Association (MMFA): 'Underlay Materials under Multilayer Modular Floor Coverings (MMF) – Test Standards and Performance Indicators' for Class 1 (with HDF core).

1. MEISTER Silence 25 DB with integrated vapour barrier | 3 mm
2. MEISTER-Silence 20 | 2.5 mm
3. MEISTER Silence 15 DB with integrated vapour barrier | 2 mm

4. MEISTER Twin Control with integrated vapour barrier and adhesive strips | 2 mm
5. MEISTER foam film | 2 mm
