

## LOTUS GLOBAL – BLUPAK – FILM ON ROLLS / FLAT FILM / MOTHER FILM

Our polyethylene mother film is a high-quality extruded plastic film used as the raw base material in various packaging processes. It is available in different formats depending on the application:

- **Tubular film** – seamless extrusion, ideal for automated packaging lines
- **Half-tubular film** – folded on one side, suitable for diverse applications
- **Flat film** – fully opened film, perfect for sheet cutting and specialized use

This film is widely used in food packaging, hygiene products, construction materials, and logistics. It can be printed, laminated, perforated, or converted into bags and pouches.

Thanks to its excellent tensile strength, flexibility, and barrier properties, it serves as a reliable foundation for customized packaging solutions.
