

E90

The ECO-Rolling basket E90 has a capacity of 90 litres and is made from 80% post-consumer recycled material.

Equipped with 50 mm swivelling front castors and 75 mm fixed rear wheels, with bearings and hubcaps, which is suitable to carry heavier weights than conventional baskets, keeping the handling capacity. Its large and square bottom is designed to carry bulky products, making it a perfect solution for supermarkets and hypermarkets, as well as toy, sports, home, gardening and DIY stores. It also features a reduced stacking distance, allowing space optimisation in stores and shops.

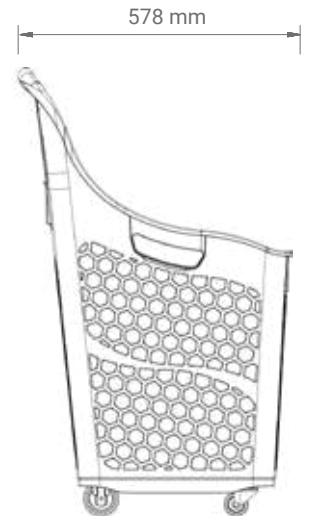

It is only available in **ECO grey colour**. As it is made from recycled material, the colour tone may vary slightly.

It offers the possibility to add a **non-removable personalised logo** through In-Mould Labelling (IML).
