

## E28

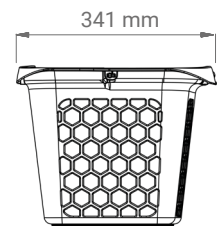

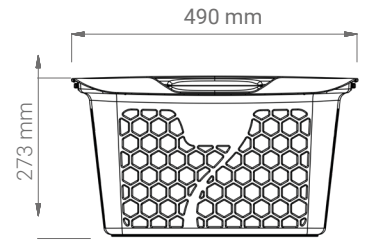

The E28 shopping Basket is committed to protecting the environment, the reduction in the use of raw materials and the reduction of energy consumption and CO2 emissions on the planet. It is made with post-consumption recycled materials.

Polycart supports the circular economy and the sustainability through environmentally friendly production processes.

The E28 shopping Basket has a capacity of 28 litres, and weighs less than 1kg, making it very light, handy and stackable.

Made in the same style as the rest of the Polycart products, it has been designed having in mind the comfort of the user, with the Easy Hold ergonomic curves which reduce the effort of the buyer by letting the arm rest in a more natural position, closer to the body. It has a foldable handle with a retention system that avoids it from folding by itself. The handle offers a very comfortable grip.

It is an ideal basket for small stores, convenience stores and also for supermarkets. Thanks to its reduced size and nestability it is possible to place a good number of baskets anywhere in the store.

### DIMENSIONS

Length	341 mm.
