CLEANING MATERIALS BY ILLE

ONE COLOUR ONE OPERATING AREA

ILLE RED bath & toilet

The sanitary maintenance cleanser based on fruit acid cleans without the addition of muriatic acid. ILLE RED is suitable for the gentle application on acid-resistant materials in wash and toilet rooms. This applies to tiles, porcelain, stoneware, ceramic, artificial stone as well as sinks, toilets and other sanitary facilities. The kind fragrance arranges a pleasant freshness.

ILLE BLUE domestic

The mild universal cleaner ILLE BLUE cleans all waterproof surfaces while removing any moisturising or greasy film building substances. The cleansed surfaces dry quickly and without any residue marks, surfaces remain streak and striation free. It is applicable on glass, synthetic materials, ceramic wall and floor tiles, laminate, varnished wooden flooring, PVC, linoleum, artificial and natural stone. Due to the controlled alcohol level it is especially gentle and fresh.

ILLE YELLOW floor

ILLE YELLOW – the cleanser is made of water soluble polymers for daily maintenance cleaning. Suitable for manual application and machine application on all waterproof flooring. The cleanser is polish able and suitable for high speed procedure. With the fragrance of fresh lemon.

ILLE GREEN kitchen

ILLE GREEN is usable in the gastronomy and in the food processing industry to dissolve fats, oils and soot manually or by using machines (including high-pressure cleaner). It is made for the cleansing of floorings, walls, ceilings, work surfaces, equipment as well as all alkali-resistant floorcoverings. ILLE GREEN distinguishes itself by a good effectiveness of the dispersion and has been approved for the food sector. The cleanser is also biodegradable according to the EG regulation of detergents.

- ✓ Free of phosphates and nanoparticles.
- ✓ HACCP-certificate of free sale exist for each product.

Sustainability is really important for us. ILLE RED, ILLE BLUE and ILLE YELLOW therefore have been awarded twice: The two seals of quality "EU Ecolabel" and "Blauer Engel" confirming the best environmental compatibility.
