

Mailing/Courier Bags

100% Compostable

Dedicated production & expertise manufacturer in a core range of compostable mailing bags.

Mailing/courier bags are designed for protecting products and delivery of those products. Plastic mailing bags are lightweight, saves money on postage and water resistant.

Euro has launched a new range of **PLA,PBAT** starch-based mailing/courier bags as an alternative **SUSTAINABLE** solution to conventional PE -based bags. Made from renewable bio-based plant material. When buried in real soil environments, it breaks down completely and leaves no toxic residues behind.

Product Specification

- Length: 250 -600mm | Width: 200 -600mm.
- Thickness 40 - 65mu.
- Material Base -PLA, PABT.
- Maximum 4 colour printing capability.
