Model : IM C8000		⊠ Сору	⊠ Print	☐ Fax	⊠ Scan
Tachnalamı		Monochrome		⊠ Colour	
Technology		⊠ Electrophoto	graphic	☐ Inkjet Technol	ogy
Print Speed Simplex, DIN-A4 pagaccording to ISO/IEC 24734	rint Speed Simplex, DIN-A4 pages/min,			Colour: 80	
Copying Speed Simplex, DIN-A4 pages/min, according to ISO/IEC 24735		Monochrome: 80)	Colour: 80	
The system is designed for use in the professional/commercial sector.					
2 Technical Safety (Declaration	2 Technical Safety (Declaration of Conformity				
The system complies with the fo	llowing EU regu	ılations as far as	they are appli	cable and bears the	e CE mark
 Radio Equipment Directive 2014/53/EU RoHS Directive 2011/65/EU ErP Directive 2009/125/EC 					
3 Environmental Labels					
 www.blauer-engel.de/uz219 low energy consumption low emissions and noise durable The TEC value of the product based on the ENERGY STAR® Version 3.0 Test Method, and tested by the manufacturer, satisfies the program requirements. The requirements of the Blue Angel DE-UZ 219 eco-label were tested and met with the toner supplied and recommended.					
by Ricoh. Further information on the Blue Angel can be found at: https://www.blauer-engel.de/en 4 Use and labelling of materials					
Paper	The device is suitable for processing recycled paper that complies with EN 12281:2002 We recommend using the machine in duplex mode (double-sided copy/print). The model is equipped with a duplex and N-up function: ☐ Optional				
Toner/ Ink	⊠ Toner				
Ames-Test	Negative (refer to Safety Data Sheet)				
Photo Conductor Unit	Organic Photo Conductor (OPC)				
Batteries	Mangandioxide Lithium free of lead, cadmium and mercury				
Flame Retardents	 No halogenated flame retardants are used in housing parts and other plastic parts over 25 g, especially not: Polybrominated Biphenyles (PBB), Polybrominated Biphenylether (PBDE) and Tetrabrombisphenol A (TBBPA). 			· plastic parts over	
Marking of Plastic Parts	All plastic parts >25g are marked in accordance with ISO 11469:2000 and ISO 1043.				and ISO 1043.

Proportion by weight of recycled plastic relative to total plastic (Post-consumer)	□ 0 – 1 % □ 1 – 5 % □ 5 – 10 %		☐ 10 – 15 % ☐ 15 – 20 % ☐ 20 – 25 %			
Legal requirements for recycling (WEEE)	The device fully complies with WEEE requirements.					
5 Yield of consumables						
Consumable	Description E	DP	Yield (A4)	Test Procedure		
	Print Cartridge Black MP C8003 84	2192	47.000			

Print Cartridge Magenta MP C8003 842194 26.000

Print Cartridge Cyan MP C8003 842195 26.000

Note on the ranges given here: The actual yield depends on the image size and brightness, the number of pages to be printed at one time, the type and size of paper used, the contents of the printed images, and environmental conditions such

842193

26.000

Print Cartridge Yellow MP C8003

as temperature and humidity. Refer to the system's Operation Guide for more information on run times and the change intervals of consumables.

Note on handling the toner containers: Do not open the toner containers. When replacing them, please follow the instructions in the operating manual. Do not inhall any locking toner as a result of improper handling, but wips it off with a

Note on handling the toner containers: Do not open the toner containers. When replacing them, please follow the instructions in the operating manual. Do not inhale any leaking toner as a result of improper handling, but wipe it off with a damp cloth. Avoid skin contact. If toner gets onto the skin, wash affected areas with plenty of cold water and soap. **Keep toner (old or new) out of the reach of children!**

6 Warranty and spare parts

The guarantee for the devices corresponds to the legal regulations, as far as these are binding. All Ricoh distributors and subsidiaries offer all-in service contracts that go beyond the legal warranty. Please contact your local Ricoh office or distributor. Consumables and essential spare parts are available at least 5 years after the last unit in this series was sold.

7 Cleaning and Maintenance

Cleaning, maintenance and disposal activities may only be carried out by qualified personnel. Further information on cleaning and maintenance of the system can be found in the chapter "Maintenance and

Specification" of the operating instructions.

8 Power Consumption	Determined according to DE-UZ 219 and ENERGY STAR in delivery condition				
Operating Mode	Default Delay Time	Return Time ²⁾ (s)	Power Consumption (Watt)		
Maximum Power Consumption	2400				
Continuous Operation 80 ppm (15	1474				
Ready	0	0	178.8		
Low Power Mode	15 or switch energy saver button] 4		170.4		
Sleep Mode	45 8		< 0.8		
Off Mode	Switch	< 0.3			
TEC (Typical Electricity Consump	1.65 kWh/week				

1) Default Delay Time: The time that elapses after the end of the printing process until the device automatically switches to an idle state.
2) Return Time: The time it takes for the device to return from an energy-saving state to a print-ready state.

This product is designed to save energy costs. The system automatically reduces energy consumption when not used for a period of time (1 minute). This mode is called Sleep Mode. From these states, the machine returns to standby printing in a short time (the return time listed above) when it receives a print or copy job. This allows you to save energy without limiting your productivity. With its return time, the system meets the high requirements of the Blue Angel, which attaches particular importance to user-friendliness in this respect.

The activation times for the sleep mode can be changed by the user in the range 1-60 minutes.

However, if the activation times are increased, this leads to higher energy consumption and thus to higher electricity costs. It is therefore recommended not to change the preset activation times.

System: IM C8000 Ausgabe: 10th August 2021

Seite 3 von 4

When the main switch is actuated, there is still a low power consumption of max. 0.3 watts. Complete disconnection from the mains can be achieved by pulling the mains plug. Please observe the instructions in the operating instructions in order to prevent damage to the system and possible loss of data.

The device is designed so that it can be switched off at least twice a day.

Note on TEC (Typical Electricity Consumption). The aim of the TEC method is to determine the energy efficiency of hardcopy devices (copiers, printers, multifunction systems) and to make them comparable. The method determines the energy consumption of a product over a fixed period of time under normal operating conditions.

The following usage cycle is assumed for the present system:

Per working day 32 print jobs with 100 pages, simplex at monochrome printing, (3200 pages/day).

Hence, the energy consumption for a week in standard usage cycle according to ENER-GY STAR version 2.0 (7-day-week with 5 working days of 8 hours) is 1.65 kWh per week.

	with 5 working days of 6 flours) is 1.05 kwill per week.

LOD = Limit of detection, LOQ = Limit of qualification Blue Angel recommendation: New electronic devices generally emit volatile substances into the room air. For this reason, sufficient air exchange in the installation rooms and, if necessary, at the workplace should be ensured, especially in the first few days after the unit has been installed. The system is equipped with an ozone filter: Yes: Not applicable: The system is equipped with dust filters:. Yes: Not applicable: Further information on the filter change cycle can be found in the operating instructions
