

Livarno Home Insect screen for windows telescopic 120x140cm

Description

Features

- Natural insect screen when the window is open
- Size individually adjustable due to telescopic frame
- Easy installation without drilling - ideal for rental properties
- UV and weather resistant PET insect screen fabric with high air permeability and brilliant transparency
- Ideal also for mounting between window and roller shutter (from 14 mm gap)
- Frame colors: anthracite, white
- Easy installation with bending angle and integrated bending tool
- High resistance due to weatherproof materials
- Stable, powder-coated telescopic aluminum frame system
- Optimal closure to the window frame due to brush seals
- Corner connectors with profile overlap for a visually clean transition

Material

Frame: Aluminum
insect screen fabric: plastic
