Meet & Seat
from P. 15

Versatile furniture for lively offices with wellbeing character

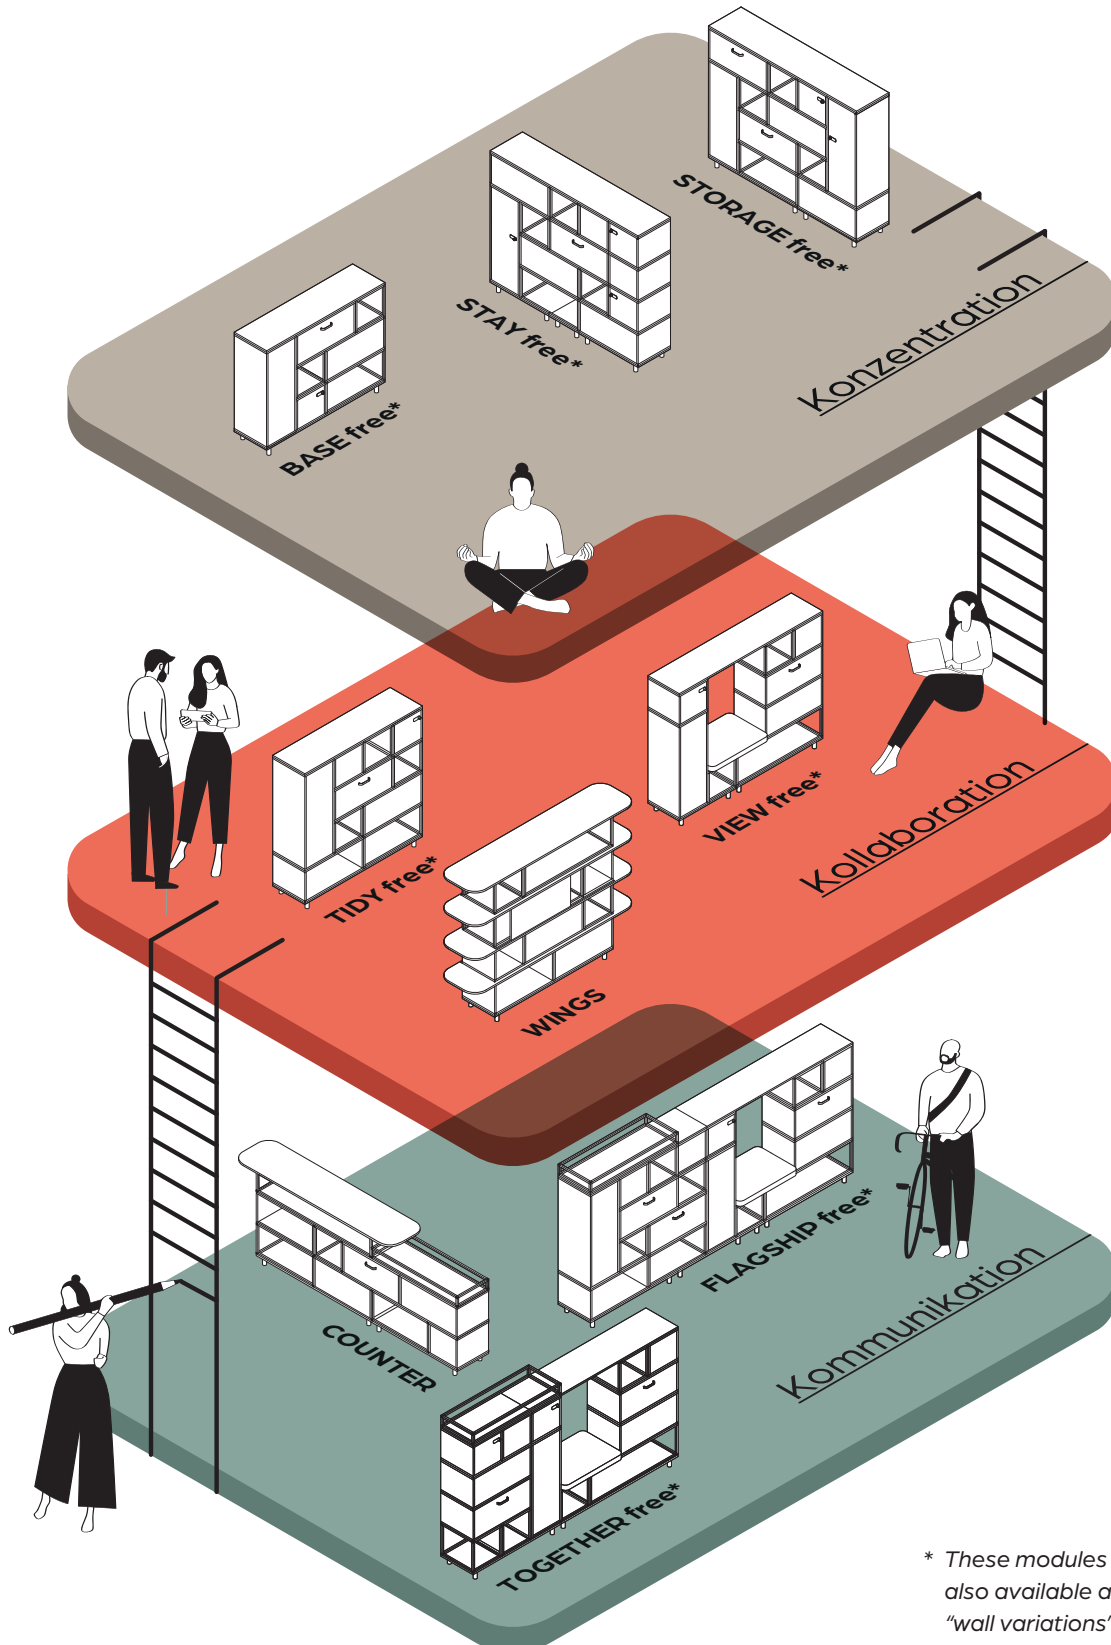

Employees who feel well and can expand their potential are the key factor for successful companies. Modern work environments play an important role.

With our new **Ways** and **Meet & Seat** developments, we design your spaces for the dynamic and cooperative interaction of your staff. The versatile storage room programme and the modular table system are designed in

such a manner that everything is possible. From stand-up meeting to project rooms and desk-sharing workspaces. With "Well Being", "Nordic" and "Black & White", you can choose between three harmonically synchronised colour worlds made of sustainable materials. Just select and enjoy.

Ways – New ways to design gaps

* These modules are also available as "wall variations"

What lends structure to open spaces? Ways is the perfect room divider, shelving systems, locker and personal storage areas in one system. Open libraries with seats for inspiring team sections, transparent shielding for work spaces, lockable, private storage areas where they are needed and space for the favourite vase – Ways provides it all. Open spaces are given structure and provide your employees with dynamic feel-good workplaces with the freestanding storage system that can be operated from both sides.

Black & White – Noticeable Contrasts

Ways COUNTER with wood accent alternatives can also be selected with yellow or red accents.

Contrasts of black and white create impressive interiors. In our Black & White colour worlds, you can choose from three strong accents – high quality walnut, happy yellow or daring red. Here, your office furniture becomes micro architecture. Select your modules and design your individual working environment:

Clear blue shades combined with maple and colourful, textile highlights create spaces to concentrate and feel well. The "Nordic" colour scheme brings the Hygge feeling into the office and makes your employees happy to come to work. Here, every favourite piece has its harmonious periphery and the work place becomes the favourite place.

Make your choice and create your modern ambience:

Wellbeing – Natural ambience

Ways WINGS with movable NeoTex elements

Natural green tones, rose and oak create a warm and stimulating interior. With our “Wellbeing” colour scheme, you bring nature into your office and create a stress-reduced feel-good atmosphere for your employees. Ideally complemented with real plants. Select your modules and design your individual feel-good office:

Flexible, structure-providing gaps characterise the atmosphere in the office.

The diverse Ways – Modules can be flexibly combined and used for shielding, structure-providing elements or private storage areas. This makes optimal use of space and creates agile working environments. The well-balanced mix of transparency and shielding results in the perfect feel-good atmosphere.

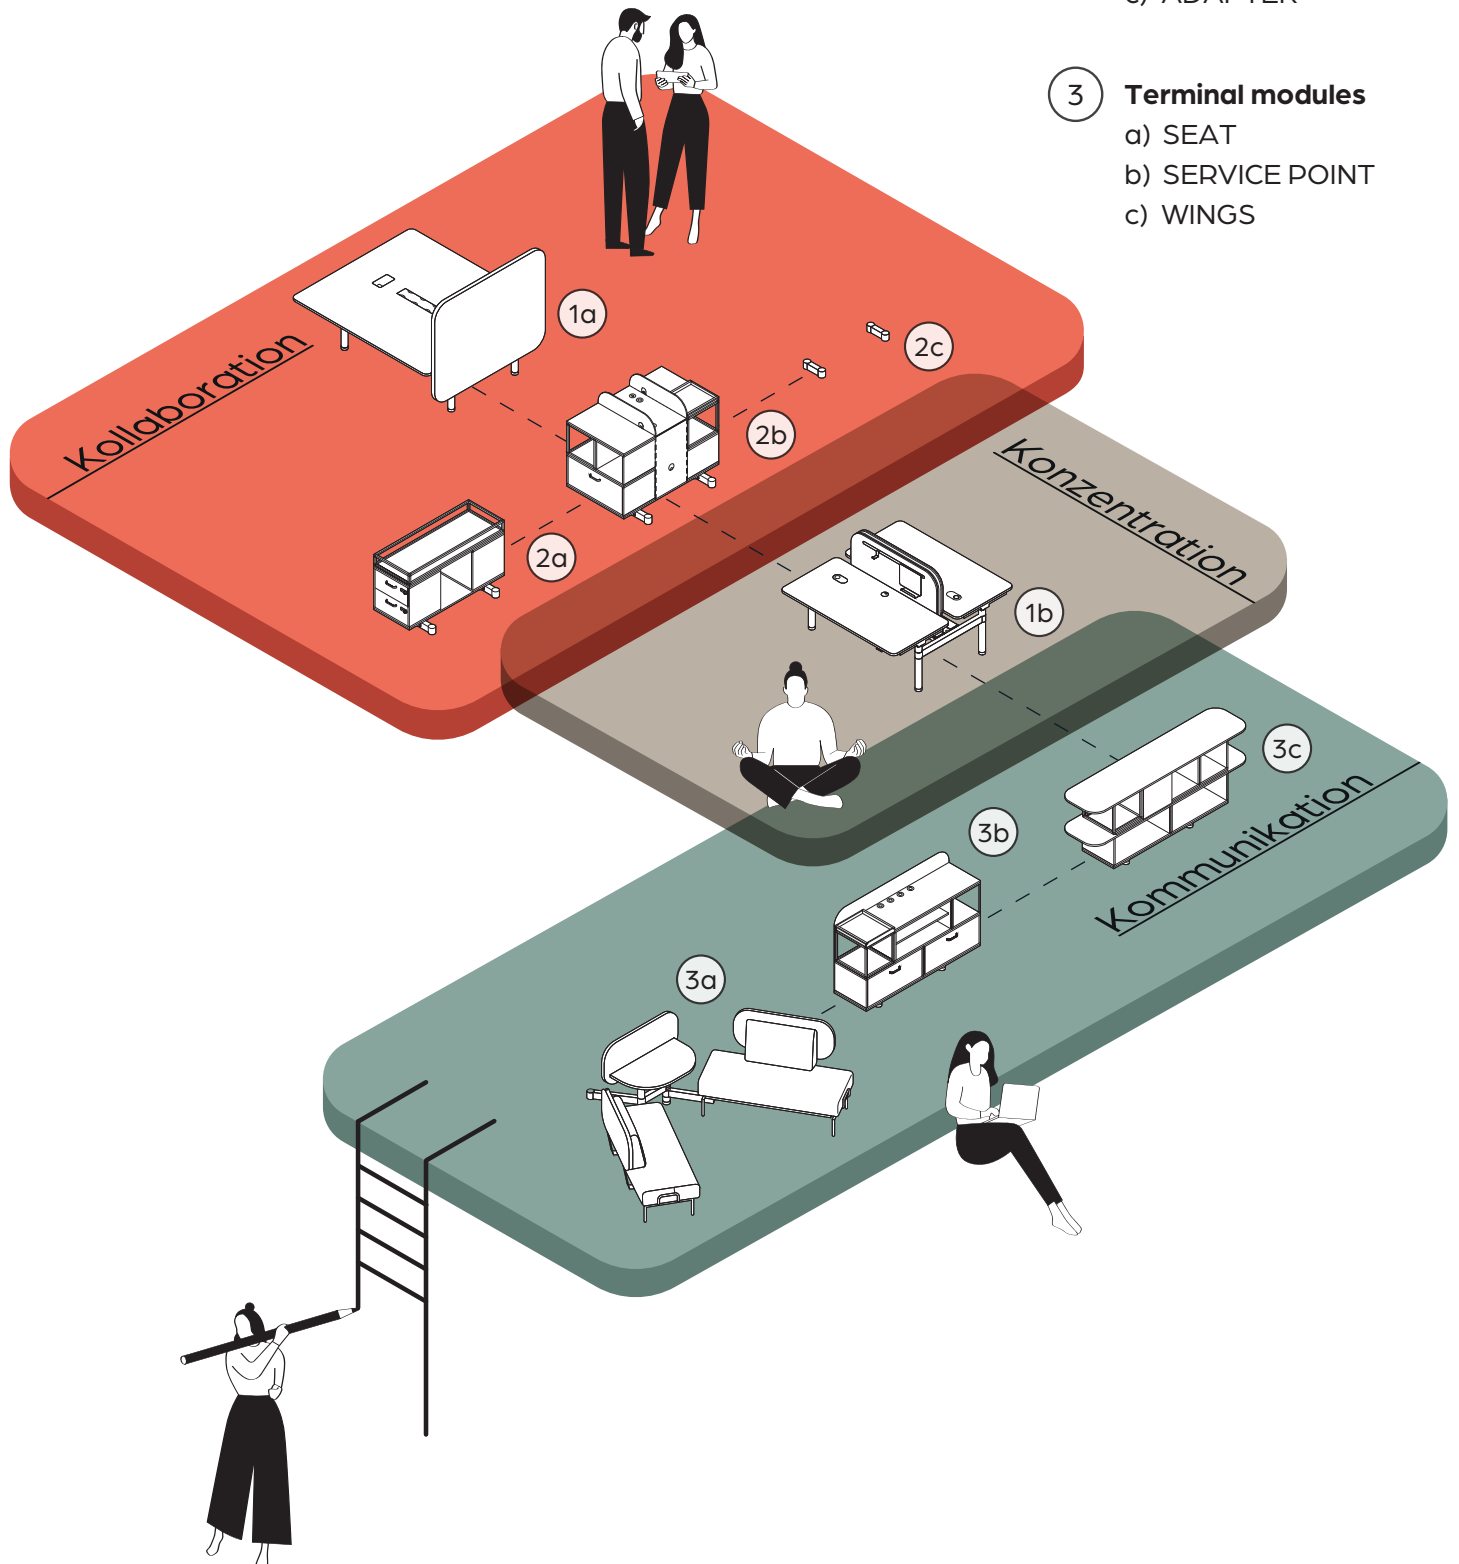

Together with our customers, we design active future work environments.

Meet & Seat – Joint focus

- ① **Main modules**
 - a) MEET
 - b) WORK

- ② **Connection modules**
 - a) STORAGE
 - b) SERVICE POINT
 - c) ADAPTER

- ③ **Terminal modules**
 - a) SEAT
 - b) SERVICE POINT
 - c) WINGS

Meet & Seat combines ergonomic work, clever storage spaces, lounge furniture and space for spontaneous meetings.

The unlimited, optional configurations offer numerous possibilities for the design of working environments, meeting islands, self-sufficient project islands and interim zones. Here, apparent opposites become complementary features. Concentrates focussing and collaborative works happen in one place.

Turn your office into a feel-good place which enables all individual work methods.

STORAGE

The two height-adjustable main modules WORK and MEET are equipped with acoustically effective NeoTex shielding and they offer ergonomics and privacy at the workplace. Combined with the smart connection modules SERVICE POINT or STORAGE connection modules, they become self-sufficient work islands – ideal for temporary desk-sharing workstations.

SEAT

Meet & Seat can be used to create small stand-up meeting spaces as well as large project islands in central zones. The terminal module SEAT invites to short informal discussions with colleagues and to switch work positions. The SERVICE POINT modules bring comfort into the workplace. The STORAGE and WINGS modules provide direct storage space.

STORAGE

With Meet & Seat, it is possible to create flexible, versatile work situations for a variety of demands. The harmonious combination of colours and materials creates comfortable working isles where communicative and concentrated working alternate and supplement. Clever details such as hidden cable ducts and freely positionable Add-ons (hooks and memo boards) round off the system.
