

Blue Angel Environmental Information and Data Sheet Model: P 800

Issued: 01 January 2025

EDP: 418470

1 General Specification						
Primary functions of the base ur	nit					
-	in the second se					
Model : P 800		Сору	🛛 Print	☐ Fax	☐ Scan	
Technology		Monochrome				
		Electrophot	ographic	Inkjet Technology		
Print Speed Simplex, DIN-A4 pag according to ISO/IEC 24734	ges/min,	Monochrome: 55		Colour: n.a.		
Copying Speed Simplex, DIN-A4 according to ISO/IEC 24735	pages/min,	Monochrome: n.a.		Colour: n.a.		
The system is designed for use	in the professio	nal/commercial	sector.	·		
2 Technical Safety (Declaration	on of Conformity	у				
The system complies with the fo	llowing EU regu	lations as far a	is they are applic	cable and bears t	the CE mark	
 Radio Equipment Directive 201 RoHS Directive 2011/65/EU ErP Directive 2009/125/EC 	4/53/EU					
3 Environmental Labels						
www.blauer-engel.de/uZ219 • low energy consumption • low emissions and noise • durable The TEC value of the product based on the ENERGY STAR® Version 3.0 Test Method, and tested by the manufacturer, satisfies the program requirements. The requirements of the Blue Angel DE-UZ 219 eco-label were tested and met with the toner supplied and recommended by Ricoh. Further information on the Blue Angel can be found at: https://www.blauer-engel.de/en						
4 Use and labelling of materia	-					
Paper	The device is suitable for processing recycled paper that complies with EN 12281:2002. We recommend using the machine in duplex mode (double-sided copy/print). The model is equipped with a duplex and N-up function: Standard					
Toner/ Ink	Toner 🛛	🗌 lnk				
Ames-Test	Negative (refer to Safety Data Sheet)					
Photo Conductor Unit	Organic Photo Conductor (OPC)					
Batteries	-		ead, cadmium and			
Flame Retardents	25 g, especiallyPolybrominPolybromin		i (PBB), her (PBDE) and	sing parts and oth	ner plastic parts over	
Marking of Plastic Parts	All plastic parts	>25g are marke	d in accordance v	vith ISO 11469:20	00 and ISO 1043.	

Proportion by weight of recycled plastic relative to total plastic	\Box 0 - 1 % \Box 10 - 15 % \boxtimes 1 - 5 % \Box 15 - 20 % \Box 5 - 10 % \Box 20 - 25 %							
(Post-consumer) Legal requirements for recycling (WEEE)	The device fully complies with WEEE requirements.							
5 Yield of consumables								
Consumable	Description	EDP	Yield (A4)	Test Procedure				
Toner Cartridges	Print Cartridge IM 600	418478	25.500	ISO/IEC 19752				
Starter Toner	10.000 ISO/IEC 19752							
Note on the ranges given here: The actual yield depends on the image size and brightness, the number of pages to be printed at one time, the type and size of paper used, the contents of the printed images, and environmental conditions such as temperature and humidity. Refer to the system's Operation Guide for more information on run times and the change intervals of consumables.								
Note on handling the toner containers: Do not open the toner containers. When replacing them, please follow the instructions in the operating manual. Do not inhale any leaking toner as a result of improper handling, but wipe it off with a damp cloth. Avoid skin contact. If toner gets onto the skin, wash affected areas with plenty of cold water and soap. Keep toner (old or new) out of the reach of children!								
6 Warranty and spare parts								
The guarantee for the devices corresponds to the legal regulations, as far as these are binding. All Ricoh distributors and subsidiaries offer all-in service contracts that go beyond the legal warranty. Please contact your local Ricoh office or distributor. Consumables and essential spare parts are available at least 5 years after the last unit in this series was sold.								
7 Cleaning and Maintenance		·	·					
Cleaning, maintenance and disposal activities may only be carried out by qualified personnel. Further information on cleaning and maintenance of the system can be found in the chapter "Maintenance and Specification" of the operating instructions.								
8 Power Consumption	Determined according to DE-UZ			lelivery condition				
Operating Mode	Default Delay Time	Return Time	²⁾ (s) Power	r Consumption (Watt)				
Maximum Power Consumption				1340				
Continuous Operation 55 ppm (1				716				
Ready	0	0		61.9				
Sleep Mode	1	26	< 0.7					
Off Mode	Switch			< 0.1				
TEC (Typical Electricity Consum	· · ·		-	0.77 kWh/Woche				
 Default Delay Time: The time that elapses after the end of the printing process until the device automatically switches to an idle state. Return Time: The time it takes for the device to return from an energy-saving state to a print-ready state. 								
This product is designed to save energy costs. The system automatically reduces energy consumption when not used for a period of time (1 minute). This mode is called Sleep Mode. From these states, the machine returns to standby printing in a short time (the return time listed above) when it receives a print or copy job. This allows you to save energy without limiting your productivity. With its return time, the system meets the high requirements of the Blue Angel, which attaches particular importance to user-friendliness in this respect.								
The activation times for the sleep mode can be changed by the user in the range 1-60 minutes. However, if the activation times are increased, this leads to higher energy consumption and thus to higher electricity costs. It is therefore recommended not to change the preset activation times. When the main switch is actuated, there is still a low power consumption of max. 0.1 watts. Complete disconnection from the mains can be achieved by pulling the mains plug. Please observe the instructions in the operating instructions in order to prevent damage to the system and possible loss of data. The device is designed so that it can be switched off at least twice a day. Note on TEC (Typical Electricity Consumption). The aim of the TEC method is to determine the energy efficiency of hardcopy devices (copiers, printers, multifunction systems) and to make them comparable. The method determines the energy consumption of a product over a fixed period of time under normal operating conditions.								
The following usage cycle is assumed for the present system: Per working day 32 print jobs with 47 pages, simplex at monochrome printing, (1504 pages/day). Hence, the energy consumption for a week in standard usage cycle according to ENER-GY STAR® version 3.0 (7-day- week with 5 working days of 8 hours) is 0.74 kWh per week.
