When no conventional drain cleaning agent can do the job – Drain Blaster can!

With no use of chemical add-ons whatsoever, the Drain Blaster tube flushes away any kind of blockage in your kitchen, bathroom or toilet drains and soil pipes. Simply connect the tube to the water tap and push the other end into the drain. Then turn up the water. The specially designed, 2,4 m long tube bundles and boosts the water pressure, so you can get finally get rid of besetting dirt and residues. Drain Blaster fits on all water taps - and it's completely ecological. The integrated return valve prevents contaminated wastewater from coming into contact with the clean drinking water circuit.
