

The AKOST ADAM KOSTYRA film consists of at least 80 % recycled old films. In the process, film waste is processed into new recycled films. Thus this AKOST ADAM KOSTYRA film contributes to the reduction of waste and conserves fossil raw materials.

The scope of application of the film in unchanged composition is the production of bags in various sizes and thicknesses: T-shirt bag, Soft loop bag, Market bag / DKT bag, Poly mailer bags, Film.
