

Sealable plastic bags are all-rounders and are known by many names

Although nowadays we can send large amounts of data with just a click of the mouse, sometimes it is nice to actually have something in your hands – large or small, light or heavy, delicate or robust. And for this, you need packaging to get it from A to B. A bag is undoubtedly one of the most popular packaging solutions for this task.

Dürrbeck produces plastic mailing bags and sealable plastic bags in all sizes and colours, which have unparalleled versatility. Here you can also find courier bags for secure weather-proof transport of documents, as well as plastic envelopes and packaging bags for textiles, for example. Sealable pouches and bags give you the utmost security for your goods and, depending on your requirements, can provide discretion or visibility when shipping. Plus, they can be printed or customised as you wish.

Choose from a reusable seal or adhesive closure, or a seal for one-time use. We can even produce sealable plastic bags with safety closures – for mailers or envelopes with valuable contents, for example.
