

Product information

"Nowy Styl eModel 3.0 sit/stand desk"

The sit/stand desk with its innovative electric height adjustment offers a particularly ergonomic workplace. The uncomplicated operation enables a more frequent change of working posture. The entire musculature is used and the intervertebral discs are better supported. This takes account of the idea of prevention, as complaints such as head, neck and back pain or downtime due to a slipped disc are avoided.

A look around many offices reveals the main problem: employees do not move enough and remain in a very unhealthy posture in front of their computer screens. Muscle groups that are responsible for posture are only strained on one side. This ultimately leads to pain and tension. A sit-stand desk counteracts this, as employees can switch from a sitting to a standing position as required. Phone calls, breathing and talking are often easier when standing.

This work table is height-adjustable from 65-131 cm and therefore has the largest adjustment range in its category. **As a result, the table is paid for by the BfA German pension scheme on application as part of rehabilitation and participation in working life.**

This sit/stand table is impressive:

- Hand control with display
- loadable up to 100 kg
- 5 year guarantee
- High-density chipboard 25 mm thick, emission class E1
- 3-step telescopic height adjustment from 65 cm - 131 cm usable height, max. speed 38 mm/sec.
