

# Refuse Sack & Liner

Euro SME's extensive range of refuse sacks are optimized for dispensing purposes.

We deliver product innovation through added value dispensing cartons, offering controlled usage and minimising waste. This exclusive selection offers a core choice of performance-based sacks to suit multiple industrial and janitorial applications. Additionally, we offer refuse sacks manufactured from 100% high grade recycled polythene, combining technical performance with sustainability and environmental responsibility.

We also manufacture a core range of retail ready household sacks and liners. Primarily packed on a roll format, this product selection provides visual clarity and consistency, delivering product choice to offer a complete one stop shop opportunity.
