## Blue Angel Environmental Information and Data Sheet Model: SP 330SN

Issued: 25th August 2021 or from S/N 5140ZA30001

1 Canaral Specification						
1 General Specification						
Primary functions of the base ur	lit	T				
Model : SP 330SN		🛛 Сору	🛛 Print	☐ Fax	🛛 Scan	
Taskaslama		Monochron	ne	Colour		
Technology		Electropho	tographic	🗌 Inkjet Tech	Inkjet Technology	
Print Speed Simplex, DIN-A4 pag	ges/min,	Monochrome: 32		Colour: NA		
according to ISO/IEC 24734		Monochrome: 32				
Copying Speed Simplex, DIN-A4 nach ISO/IEC 24735	pages/min,	Monochrome: 13		Colour: NA	Colour: NA	
The system is designed for use	in the professio	nal/commercia	l sector.			
2 Technical Safety (Declaration	on of Conformit	У				
The system complies with the fo	llowing EU regu	ulations as far a	as they are app	licable and bears	the CE mark	
<ul> <li>Radio Equipment Directive 201</li> <li>RoHS Directive 2011/65/EU</li> <li>ErP Directive 2009/125/EC</li> </ul>	RoHS Directive 2011/65/EU					
3 Environmental Labels						
<ul> <li>www.blauer-engel.de/uZ219</li> <li>low energy consumption</li> <li>low emissions and noise</li> <li>durable</li> </ul> The TEC value of the product based on the ENERGY STAR® Version 3.0 Test Method, and tested by the manufacturer, satisfies the program requirements. The requirements of the Blue Angel DE-UZ 219 eco-label were tested and met with the toner supplied and recommended by Ricoh. Further information on the Blue Angel can be found at: <a href="https://www.blauer-engel.de/en">https://www.blauer-engel.de/en</a>						
4 Use and labelling of materia						
Paper	The device is suitable for processing recycled paper that complies with EN 12281:2002.         We recommend using the machine in duplex mode (double-sided copy/print).         The model is equipped with a duplex and N-up function:         ☑ Standard       ☐ Optional					
Toner/ Ink	Toner 🗌 Ink					
Ames-Test	Negative (refer to Safety Data Sheet)					
Photo Conductor Unit	Organic Photo Conductor (OPC)					
Batteries	Lithium-Ionen Battery (Coin Cell)					
Flame Retardents	<ul> <li>No halogenated flame retardants are used in housing parts and other plastic parts over 25 g, especially not:</li> <li>Polybrominated Biphenyles (PBB),</li> <li>Polybrominated Biphenylether (PBDE) and</li> <li>Tetrabrombisphenol A (TBBPA).</li> </ul>					

## System: SP 330SN Ausgabe: 25th August 2021 or from S/N 5140ZA30001 Seite 2 von 4

Marking of Plastic Parts	All plastic parts >25g are marked in accordance with ISO 11469:2000 and ISO 1043.				
Proportion by weight of recycled plastic relative to total plastic (Post-consumer)	$ \begin{array}{ c c c c c c c c c c c c c c c c c c c$				
Legal requirements for recycling (WEEE)	The device fully complies with WEEE requirements.				
5 Yield of consumables					
Consumable	Description	EDP	Yield (A4)	Test Procedure

8 Power Consumption	Power Consumption         Determined according to DE-UZ 219 and ENERGY STAR® in delivery condition				
Operating Mode	Default Delay Time (min)	Return Tim	e <sup>2)</sup> (s) Powe	r Consumption (Watt)	
Maximum Power Consumption				1025	
Continuous Operation 32 ppm (15 min. printing time) monochrom				520	
Ready	0 0			70	
Automatic Off Mode	0.5	6		0.9	
Off Mode	Main Switch			< 0.1	
TEC (Typical Electricity Consumption) according to ENERGY STAR®				0.42 kWh/Woche	
1) Default Delay Time: The time that el		cess until the dev		witches to an idle state.	

This product is designed to save energy costs. The system automatically reduces energy consumption when not used for a period of time (30 seconds). This mode is called Sleep Mode. From these state, the machine returns to standby printing in a short time (the return time listed above) when it receives a print or copy job. This allows you to save energy without limiting your productivity. With its return time, the system meets the high requirements of the Blue Angel, which attaches particular importance to user-friendliness in this respect.

The activation times for the sleep mode can be changed by the user in the range 0-20 minutes.

However, if the activation times are increased, this leads to higher energy consumption and thus to higher electricity costs. It is therefore recommended not to change the preset activation times.

When the main switch is actuated, there is still a low power consumption of max. 0.1 watts. Complete disconnection from the mains can be achieved by pulling the mains plug. Please observe the instructions in the operating instructions in order to prevent damage to the system and possible loss of data.

The device is designed so that it can be switched off at least twice a day.

**Note on TEC (Typical Electricity Consumption).** The aim of the TEC method is to determine the energy efficiency of hardcopy devices (copiers, printers, multifunction systems) and to make them comparable. The method determines the energy consumption of a product over a fixed period of time under normal operating conditions.

The following usage cycle is assumed for the present system:

Per working day 32 print jobs with 16 pages, simplex at monochrome printing, (512 pages/day). Hence, the energy consumption for a week in standard usage cycle according to ENER-GY STAR® version 2.0 (7-dayweek with 5 working days of 8 hours) is 0.42 kWh per week.

Noise Emissions				
9.1 According to DE-UZ 219 clause 3.5 printing mode				
Declared Sound Power Level (LwAd in dB(A) )BW	69.3			
Declared Sound Power Level (LwAd in dB(A) ) Co	NA			
9.2 According to ISO 7779 in combination with ISO 9296				
	Standby	Operation Monochr.	Operation Col.	
Sound Power Level (L <sub>WA</sub> in dB(A) )	29.6	66.0	NA	
Declared Sound Power Level (L <sub>WAd</sub> in B(A) )	3.3	6.9	NA	
Sound pressure level operator position (L <sub>pA</sub> in dB(A) )	20.8	59.0	NA	
Sound pressure level by stander position ( $L_{pA}$ in dB(A) )	19.6	54.5	NA	
10 Chemical emissions determined according to ISO/IEC 28360 with DE-UZ 219

LOD = Limit of detection, LOQ = Limit of qualification

Blue Angel recommendation: New electronic devices generally emit volatile substances into the room air. For this reason, sufficient air exchange in the installation rooms and, if necessary, at the workplace should be ensured, especially in the first few days after the unit has been installed. The system is equipped with an ozone filter: Yes: Not applicable: ⊠ The system is equipped with dust filters:. Yes: Not applicable: ⊠ Further information on the filter change cycle can be found in the operating instructions.. 11 Recycling Further cartridges

Empty toner cartridges	Collection via Ricoh Resource Smart Return Program
Full toner cartridges	Filled waste toner containers should not be disposed of with household and commercial waste. They can be handed in at any RICOH branch and at any RICOH contractual partner.

Waste Toner	Not applicable.
	Please dispose according to local legislation
Batteries	<ul> <li>☑ Collection according to local legislation.</li> <li>☑ No battery used.</li> </ul>
Photo Conductor units and spare parts	Return via Ricoh Resource Smart Return Program
Devices	Used equipment is taken back and recycled in an environmentally friendly manner or - if this is no longer possible - recycled. Information about collection points for used RICOH products in your country can be obtained from your dealers or via the RICOH website: Contact: <u>https://www.ricoh-europe.com</u>
Information on Ricoh's pan-Eu	ropean consumables collection system can be found on the following website: https://www.ricoh-return.com
