

EDP: 408267

Blue Angel Environmental Information and Data Sheet Model: SP 3710SF

Issued: 25th August 2021 or from S/N 5170ZA30733

1 General Specification					
Primary functions of the base unit					
Model : SP 3710SF		🖾 Сору	🛛 Print	⊠ Fax	🛛 Scan
Tashnalagu		Monochrome	1	Colour	
Technology	Electrophotographic		🗌 Inkjet Techn	🗌 Inkjet Technology	
Print Speed Simplex, DIN-A4 pag according to ISO/IEC 24734	jes/min,	Monochrome: 32 Colour: NA			
Copying Speed Simplex, DIN-A4 nach ISO/IEC 24735	pages/min,	Monochrome: 13 Colour: NA			
The system is designed for use i	n the professio	nal/commercial	sector.		
2 Technical Safety (Declaration	on of Conformit	у			
The system complies with the fo	llowing EU regu	ulations as far as	they are appli	cable and bears t	the CE mark
 Radio Equipment Directive 201 RoHS Directive 2011/65/EU ErP Directive 2009/125/EC 3 Environmental Labels 	4/53/EU				
www.blauer-engel.de/uz219 . low energy consumption . low emissions and noise . low emissions and noise . durable . durable					
 by Ricoh. Further information on the Blue Angel can be found at: <u>https://www.blauer-engel.de/en</u> Use and labelling of materials 					
Paper The device is suitable for processing recycled paper that complies with EN 12281:2002 We recommend using the machine in duplex mode (double-sided copy/print). The model is equipped with a duplex and N-up function: Standard Optional					
Toner/ Ink	🛛 Toner	🗌 lnk			
Ames-Test	Negative (refer to Safety Data Sheet)				
Photo Conductor Unit	Organic Photo Conductor (OPC)				
Batteries	Lithium-Ion Battery (Coin Cell)				
Flame Retardents	 No halogenated flame retardants are used in housing parts and other plastic parts over 25 g, especially not: Polybrominated Biphenyles (PBB), Polybrominated Biphenylether (PBDE) and Tetrabrombisphenol A (TBBPA). 				

System: SP 3710SF Ausgabe: 25th August 2021 or from S/N 5170ZA30733 Seite 2 von 4

Marking of Plastic Parts	All plastic parts >25g are marked in accordance with ISO 11469:2000 and ISO 1043.				
Proportion by weight of recycled plastic relative to total plastic (Post-consumer)	$ \begin{array}{c ccccccccccccccccccccccccccccccccccc$				
Legal requirements for recycling (WEEE)	The device fully complies with WEEE requirements.				
5 Yield of consumables					
Consumable	Description	EDP	Yield (A4)	Test Procedure	
Toner Cartridges	Print Cartridge SP 3710X	408285	7,000	ISO/IEC 19752	
Note on the ranges given here: The actual yield depends on the image size and brightness, the number of pages to be printed at one time, the type and size of paper used, the contents of the printed images, and environmental conditions such as temperature and humidity. Refer to the system's Operation Guide for more information on run times and the change intervals of consumables. Print cartridges (consumables) are excluded from the warranty. In case of problems, please contact the dealer from whom you purchased it. When using the device for the first time, use the print cartridges supplied with the device. This machine cleans itself periodically to maintain quality and uses toner during this process. For more information on runtimes and the respective change cycle of the consumables, refer to the operating instructions for the system. Note on handling the toner containers: Do not open the toner containers. When replacing them, please follow the instructions in the operating manual. Do not inhale any leaking toner as a result of improper handling, but wipe it off with a damp cloth. Avoid skin contact. If toner gets onto the skin, wash affected areas with plenty of cold water and soap. Keep toner (old or new) out of the reach of children! 6 Warranty and spare parts The warranty for the devices complies with the legal regulations, insofar as these are binding. All Ricoh distributors and subsidiaries offer all-in service contracts that extend beyond the statutory warranty. Please contact your local Ricoh office or the nearest distributor from whom you purchased the equipment. Consumables and vital spare parts are available for at least 5 years after the last device of this series has been sold. For more					
8 Power Consumption	Power Consumption Determined according to DE-UZ 219 and ENERGY STAR® in delivery condition				
Operating Mode	Default Delay Time (min) Return Time ² (s) Power Consumption (Watt)				
Maximum Power Consumption	n 1025			1025	
Continuous Operation 32 ppm (15 min. printing time) monochrom 512				512	
Ready	0	0		70	
Automatic Off Mode	0.5	6		0.9	
Off Mode	Main Switch < 0.1				
TEC (Typical Electricity Consumption) according to ENERGY STAR® 0.42 kWh/Woche).42 kWh/Woche		
 Default Delay Time: The time that elapses after the end of the printing process until the device automatically switches to an idle state. Return Time: The time it takes for the device to return from an energy-saving state to a print-ready state. 					
This product is designed to save energy costs. The system automatically reduces energy consumption when not used for a period of time (30 seconds). This mode is called Sleep Mode. From these state, the machine returns to standby printing in a short time (the return time listed above) when it receives a print or copy job. This allows you to save energy without limiting your productivity. With its return time, the system meets the high requirements of the Blue Angel, which attaches particular importance to user-friendliness in this respect.					

RICOH Europe

The activation times for the sleep mode can be changed by the user in the range 0-20 minutes.

However, if the activation times are increased, this leads to higher energy consumption and thus to higher electricity costs. It is therefore recommended not to change the preset activation times.

When the main switch is actuated, there is still a low power consumption of max. 0.1 watts. Complete disconnection from the mains can be achieved by pulling the mains plug. Please observe the instructions in the operating instructions in order to prevent damage to the system and possible loss of data.

The device is designed so that it can be switched off at least twice a day.

Note on TEC (Typical Electricity Consumption). The aim of the TEC method is to determine the energy efficiency of hardcopy devices (copiers, printers, multifunction systems) and to make them comparable. The method determines the energy consumption of a product over a fixed period of time under normal operating conditions.

The following usage cycle is assumed for the present system:

Per working day 32 print jobs with 16 pages, simplex at monochrome printing, (512 pages/day).

Hence, the energy consumption for a week in standard usage cycle according to ENER-GY STAR® version 2.0 (7-dayweek with 5 working days of 8 hours) is 0.42 kWh per week.

9	9 Noise Emissions					
9.1	9.1 According to DE-UZ 219 clause 3.5 printing mode					
Dee	Declared Sound Power Level (L _{WAd} in dB(A))BW 69.3					
Dee	Declared Sound Power Level (L _{WAd} in dB(A)) Co NA					
9.2	9.2 According to ISO 7779 in combination with ISO 9296					
	Standby Operation Monochr. Operation Col.					

Sound Power Level (L _{WA} in dB(A))	29.6	66.0	NA
Declared Sound Power Level (L _{WAd} in B(A))	3.3	6.9	NA

IOD = I imit of de	etection. I OQ = I imit of qua	lification			

Limit of detection, LOQ = Limit of gualification

Blue Angel recommendation: New electronic devices generally emit volatile substances into the room air. For this reason, sufficient air exchange in the installation rooms and, if necessary, at the workplace should be ensured, especially in the first few days after the unit has been installed.

Yes: 🗌

The system is equipped with an ozone filter:

Not applicable: Not applicable:

Yes: 🗌 The system is equipped with dust filters:. Further information on the filter change cycle can be found in the operating instructions.

11	Recycling	3

Empty toner cartridges	Collection via Ricoh Resource Smart Return Program
Full toner cartridges	Filled waste toner containers should not be disposed of with household and commercial waste. They can be handed in at any RICOH branch and at any RICOH contractual partner.
Waste Toner	Not applicable.
Waste Tonei	Please dispose according to local legislation
Batteries	Collection according to local legislation.
Datteries	No battery used

Photo Conductor units and spare parts	Return via Ricoh Resource Smart Return Program		
Devices	Used equipment is taken back and recycled in an environmentally friendly manner or - if this is no longer possible - recycled. Information about collection points for used RICOH products in your country can be obtained from your dealers or via the RICOH website: Contact: <u>https://www.ricoh-europe.com</u>		
Information on Ricoh's pan-European consumables collection system can be found on the following website: https://www.ricoh-return.com			
12 Other
