

Manufactured throughout our group owned, state-of-the-art production facility in Malaysia, we offer over 20 years of expertise and experience in a range of vest style carriers.

Euro SME can produce vest style carrier (also known as T-shirt bags) in a range of sizes, colors and designs, from plain vest carriers to premium reusable printed vest carriers - printed with up to 6 colors. We are capable of manufacturing from a range of materials. Be it compostable or recycled made with certified Post Consumer Waste or Ocean Waste Material.

HELPING TO PRESERVE OUR SEAS AND OCEANS

Ocean Waste Vest Carrier

Ocean waste Vest Carrier is produced using Ocean Waste Material (OWM) - abandoned plastic waste on its way to our ocean.

OWM is a critical element in the fight against oceanic plastic pollution. Focusing on capturing OWM before it becomes ocean plastics is therefore a direct and very effective way to limit the damage our oceans are suffering.

ECO-FRIENDLY CARRIER BAGS

Headline capabilities

-  Width: 170 – 550 mm (6.69 – 21.65 in)
