Character	Hard-wearing finish	Natural oil surface that allows the wood to breathe	The natural matt surface finish with the best possible protection
Ingredients	Performance-optimised acrylic resin	Ingredients based on renewable raw materials	High-quality acrylic resins combined with ingredients on a natural basis
How it works	High-grade, UV-cured acrylic resins coat the wood with a 40-50 μm thick protective varnish, making the parquet surface resistant to abrasion, scratches and stains.	The floor care oil is based on natural ingredients. It penetrates deep into the pores of the wood and protects the parquet floor from dirt and from drying out. The wood can breathe and retains its natural look and feel.	<i>naturaDur</i> surface treatment combines the natural look of oiled parquet with the protection and easy care of a prefinished surface
