Trillo^{Pro}

Designer ITO Design

Description Unpretentiously designed swivel chair, perfect in its simplicity. No complicated mechanisms and multiple functions are required to meet the needs of users. At work, we sit less and less at our desk for eight hours, and change position and place more and more frequently. TrilloPro will accommodate every user in the office or co-working space.

USP

- Nice and simple design, reducing complexity
- Chair dedicated for modern, co-working places
- Synchro Self mechanism – fitted for every user
