

Name/Designation of the server:

1 Energy efficiency of the server:

SPEC SERT Version ($\geq 2.0.8$)	
Eff _{Active}	
SERT Idle state power [W]	
SERT Active state power [W]	
Idle to Active ratio	

2 Basic features of the server

Formfaktor [Rack / Blade / Tower / ...]	
System type [resilient / One-node / multi-node / ...]	
Number of available CPU sockets	

3 Configuration of the servers

Component	Number of identical components	Designation / Name	Rated electrical power/Thermal design power (TDP)
PSU			
CPU			
GPU			
HDD			
SSD			
RAM			

Description of the server / special features - Free text

[illegible]

4 Power supply performance characteristics

Multiple outputs/single output [-]	
Efficiency at 50% of rated load [%]	
Power factor at 50% of rated load [-]
