

Annex 2 for the contract pursuant to DE-UZ 132**Environmental label for****„Low-Emission Thermal Insulation Material and
Suspended Ceilings for Indoor Use“****Please use this****Printed form**

Manufacturer/Supplier:

Declaration

For the following products:

General substance requirements

The products do not contain or split off any substances or mixtures¹ with the following properties as a constituent component²:

- Substances which are identified as particularly alarming under the European Chemicals Regulation REACH³ (1907/2006/EC) and which have been incorporated into the list drawn up in accordance with Article 59, Paragraph 1 of the REACH Regulation (so-called "SVHC list of candidates").⁴
- Substances that according to the CLP Regulation (EC) No. 1272/2008⁵ have been classified in the following hazard categories or which meet the criteria for such classification⁶:
 - carcinogenic in categories Carc. 1A or Carc. 1B⁷
 - germ cell mutagenic in categories Muta. 1A or Muta. 1B
 - reprotoxic (teratogenic) in categories Repr. 1A or Repr. 1B

¹ Terms in the sense of § 3 German Chemicals Act (ChemG) in the version published on 28 August 2013 (BGBl. I p. 3498, 3991) or the currently valid version.

² Constituent components are substances added to the product as such or as part of a mixture and remain there unchanged in order to achieve or influence certain product properties and those required as chemical cleavage products for achieving the product properties. This does not apply to residual monomers that have been reduced to a minimum.

³ Regulation (EC) No. 1907/2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH), in short REACH.

⁴ The version of the list of candidates at the time of application is valid. The list of candidates in its relevant version can be found at: [REACH list of candidates](https://www.reach-clp-biozid-helpdesk.de/DE/CLP/Rechtstexte/Rechtstexte_node.html).

⁵ Regulation (EC) No. 1272/2008 on classification, labelling and packaging of substances and mixtures, short: CLP (Classification, Labelling and Packing). Supplementary legislative acts with respect to the CLP Regulation must also be observed (see e.g. https://www.reach-clp-biozid-helpdesk.de/DE/CLP/Rechtstexte/Rechtstexte_node.html)

⁶ The harmonized classifications and labellings of dangerous substances can be found in Annex VI, Part 3 of the CLP Regulation. Furthermore, a comprehensive classification and labelling inventory, which also includes all of the self-classifications of hazardous substances made by manufacturers, has been made available to the public on the website of the European Chemicals Agency: [ECHA classification and labelling inventory](https://echa.europa.eu/en/information-on-chemicals/clp-inventory).

⁷ Substances classified as carcinogenic 1A or 1B for which the most sensitive endpoint for a threshold at which there is no further indication of a carcinogenic potential can be determined and for which a LCI value can be determined on this basis and are stated in Table 1 of the AgBB evaluation procedure for VOC from building products are exempt from this rule.

- acute toxicity (poisonous) in categories Acute Tox. 1, Acute Tox. 2 or Acute Tox. 3
- specific target organ toxicity in categories STOT SE 1 or STOT RE 1
- hazardous to water in categories Aquatic Acute 1, Aquatic Chronic 1 or Aquatic Chronic 2

The hazard statements (H Phrases) that correspond to the hazard categories can be found in Appendix A

- Substances that are classified in TRGS 905⁸ as:
 - Carcinogenic (K1A, K1B)
 - Germ cell mutagenic (M1A, M1B)
 - Reprotoxic (R_F1A, R_F1B)
 - Teratogenic (R_D1A, R_D1B)

Halogens

No halogenated organic compounds are used in the manufacture of the products (e.g. as a binding agent, flame retardant or dirt-repellent finish).

Flame retardants

The products do not contain any flame retardants classified as persistent, bioaccumulative and toxic (PBT) substances or as very persistent and very bioaccumulative (vPvB) substances according to the criteria of Annex XIII to the REACH Regulation 1907/2006/EC.

No flame retardants are being used.

The following flame retardants are being used:

Name of the flame retardant	CAS number

Plasticisers

Products that contain plasticising substances from the group of phthalates or group of organophosphates or other comparable substances with a high boiling point as a plasticiser according to VdL Guideline 01⁹ are not added to the products.

Place: _____ (legally binding signature
Date: _____ and company stamp

⁸ TRGS 905, directory of carcinogenic, mutagenic or teratogenic substances from the Committee for Hazardous Substances (AGS): [TRGS 905](https://www.trgs.de/). The current version at the time of application is valid. The TRGS lists such CMR substances that have not received harmonised classifications up to now or where the AGS has come to a different classification.

⁹ Guideline on the declaration of paints, lacquers, varnishes, renders, fillers, primers and related products (VdL Guideline 01): <http://www.wirsindfarbe.de/service-publikationen/vdl-richtlinien/>
