Manufacturer of membranes/laminates (Company):

Declaration made as a manufacturer of membranes or laminates for the company:

for the following products:

For membranes used in laminates that are produced on the basis of polyester, polyurethane, and polyamide, they must comply with at least one of the following two subcriteria.

The membranes are manufactured using a minimum content of 30 % material that has been recycled from production and/or consumer waste.

The membranes are not produced using organic solvents.

Solvent-based adhesives are not used in the laminating process. Only thermoplastic or reactive (e.g. moisture curing) hotmelt adhesives may be used. If reactive polyurethane-based hotmelt adhesives are used, the concentration of aromatic diisocyanates does not exceed a value of 0.05 mg/m³ (corresponds to 0.005 ml/m³) measured at the workplaces, expressed as an 8 hour average (shift average).

Functional products: biocides, PFC or flame retardants are not used.
