Subject: Application for the Award of the Environmental Label according to DE-UZ 179 for "climate-friendly grocery stores in the food retail sector"

Dear Sir/Madam,

Your application for the award of the Environmental Label can only be processed without delay when the following are submitted to RAL gGmbH:

- Product-related informal application on the firm's letter-head paper indicating the federal state being home to the applicant's factory that manufactures the products to be marked with the ecolabel.
- Annex 1: Declarations/compliance verifications for the contract (printed form)
- Annex 2: An Energy Performance Certificate for non-residential buildings in accordance with §§ 16 ff of the Energy Saving Directive (EnEV) from an independent expert or the calculation of the primary energy requirement according to EnEV carried out by an independent expert
- Annex 3: Certification of the energy management system according to DIN EN ISO 50001, which covers at least the retail store included in the Blue Angel application
- Annex 4: Certification according to EMAS, which covers at least the retail store in the Blue Angel application (optional)
- Annex 5: Power supply contract for certified green electricity with additionality
- Annex 6: Data for the completion of the quick efficiency check
- Annex 7: Results of the quick efficiency check
- Annex 8: Product documentation for the heat recovery installation, including information on the heat transfer capacity for utilising the waste heat
- Annex 9: Verification of the heating load of the building according to EnEV
- Annex 10: Product documentation for the refrigeration equipment and refrigeration cabinets with relevant information on the covers

- Annex 11: Product documentation for the refrigeration systems, refrigeration equipment and refrigeration cabinets with relevant information on the refrigerants used
- Annex 12: Product documentation for all systems and equipment that use refrigerants with relevant information on the refrigerants used (optional)
- Annex 13: Product documentation for the refrigeration and air-conditioning technology installed with corresponding information on the foaming agents used
- Annex 14: Documentation about the foaming agents used in the building products (optional)
- Annex 15: Verification of the calculated electrical power consumption for the interior lighting of the store
- Annex 16: Document on the calculation for the proportion of the lighting accounted for by daylight (optional)
- Annex 17: Product documentation for the installed brightness sensors (optional)
- Annex 18: Documentation on the lighting concept (optional)
- Annex 19: Documentation on the installed photovoltaic system (optional)
- Annex 20: Documentation on the size of the roof area (optional)
- Annex 21: Documentation on the quantity and type of certified paper used for printed advertising brochures
- Annex 22: In the case of buildings owned by the operator, building plans in accordance with the guidelines for sustainable building from the BMVBS including documentation of the building products used or a certificate from the DGNB of at least silver level or a comparable certificate
- Annex 23: In the case of buildings rented by the operator, building plans in accordance with the guidelines for sustainable building from the BMVBS including documentation of the building products used or a certificate from the DGNB of at least silver level or a comparable certificate (optional)
- Expected sales of the products marked with the Environmental Label during the year of application.
