

**Annex 1 to the Contract pursuant to DE-UZ 184
Environmental Label for Replacement Catalytic
Converters**

**Please only use
this form**

Declaration by the applicant

1. Participating companies

Applicant (label holder): This company submits the application. It receives the application invoice and yearly invoices. The Contract on the Use of the Environmental Label is concluded with this company.

Contact, company name, address, VAT no.

Distributor 1 (label user): This company other than the applicant distributes the replacement catalytic converter on the market. Only this company will be published as the supplier of the product on the Blue Angel website after the contract has been concluded.

Contact, company name and address

Manufacturer: This company manufactures the replacement catalytic converters or is responsible for their manufacture.

Contact, company name and address

2. Replacement catalytic converters in the application

We hereby confirm that the replacement catalytic converters in the application lie within the scope of DE-UZ 184, i.e. they are separate technical units in accordance with ECE Regulation no. 103 for installation in vehicles. In order to obtain the Environmental Label, combined systems comprising a pre-catalyst and post-catalyst are considered as a whole. In combined solutions, the entire exhaust gas treatment is contained in one component.

Name of the system family:

Enclosed is a list of the replacement catalytic converters in the application in accordance with Appendix C of DE-UZ184 (Annex 2) as an Excel file.

Enclosed is a word file for all of the products in the application for this system family for corresponding publication on the Blue Angel website.

The Word file contains:

[Label user] Replacement catalytic converters [Part number 1], [Part number 2] ...

The Excel file and the Word file are to be sent to RAL gGmbH as e-mail attachments or uploaded in the WEP-PORTAL.
(peter.buttner@ral-ggmbh.de)

3. Initial test

The complete test reports for the initial test in accordance with Paragraph 4 of these Basic Award Criteria for DE-UZ1 84 are enclosed.

The replacement catalytic converters in the application contain ceramic mineral fibres / mineral wools according to Paragraph 3.3.1. Enclosed is a declaration on compliance with the requirement in Paragraph 3.3 from the manufacturer or distributor of the synthetic mineral fibres (SMF) / high-temperature wools (HTW) used. (Annex 3)

The replacement catalytic converters in the application contain high-temperature glass wools according to Paragraph 3.3.2. Enclosed is a declaration on compliance with the requirement in Paragraph 3.3 from the manufacturer or distributor of the synthetic mineral fibres (SMF) / high-temperature wools (HTW) used. (Annex 3)

The replacement catalytic converters in the application contain other mineral wools according to Paragraph 3.3.3. Enclosed is a measurement report from a test laboratory accredited according to DIN EN ISO/IEC 17025 to determine the carcinogenicity index according to TRGS 905 based on the measurement values taken in accordance with DIN 51001.

The replacement catalytic converters in the application contain products with non-respirable fibres according to Paragraph 3.3.4. A declaration from the manufacturer or distributor is enclosed. (Annex 3)

The replacement catalytic converters in the application contain **no** ceramic mineral fibres / mineral wools according to Paragraph 3.3.1, **no** high-temperature glass wools according to Paragraph 3.3.2, **no** other mineral wools according to Paragraph 3.3.3 and **no** products with non-respirable fibres according to Paragraph 3.3.4

4. Follow-up tests

The applicant hereby undertakes to ensure that yearly follow-up tests are carried out on the products labelled with the Environmental Label. For this purpose, the applicant will commission an approved testing institution according to Paragraph 6 of DE-UZ 184 to purchase the products on the market and test them. When the contract has been issued, the testing institution must independently inform RAL without being requested to do so. As part of the contract for the follow-up tests, the commissioned testing institution will propose three suitable item numbers (different catalytic converters) from which RAL will select one item number at random. The test report will be sent at the same time to both the client and RAL.
